ABOUT THE STTP

Faculty attending this STTP will be able to get a thorough understanding of widely accepted IoT frameworks and standards. They will be trained on advanced concepts and methodologies of IoT to design, build and deploy IoT solutions. The training also covers popular, service-rich cloud platforms and focuses on how to build and deploy IoT applications in designing monitoring and controlling operations in different industrial applications. Practical use cases and case studies are included to ensure that the participants develop an ability to work through practical real life scenarios.

Topics to be covered:

- Introduction
- Remote PLC
- IoT in Packaging
- Maintenance
- Smart Logistics Management
- Security
- Smart Transport
- Easy Quality Control
- Smart Vehicles
- Startup Case Study
