B.Tech – I Year

(Applicable for the Batches admitted from 2020-21)

NARASARAOPETA ENGINEERING COLLEGE (AUTONOMOUS)

Kotappakonda Road, Yellamanda (Post), Narasaraopet – 522601, Guntur District, AP
Approved by AICTE, New Delhi and Permanently affiliated to JNTUK, Kakinada, Code: 47,
Accredited by NBA and NAAC, RTA Approved Pollution test Centre, ISO 9001: 2008 Certified Institution
Phone: 08647-239905 [Website: www.nrtec.in](http://www.nrtec.in)

CURRICULAR FRAMEWORK FOR REGULAR AND HONORS B.TECH PROGRAMMES OF ALL BRANCHES

PREAMBLE

The rapid transformation in every sphere of life is augmenting the need to prepare the present fast-paced generation to adapt to the changing knowledge & skill requirement on a life-long basis, in the fields of science, engineering, technology and humanities to influence society positively. The future looks up to multi-disciplinary, competent leaders who are Information and Communication Technology ready and driven by strong ethical values.

NEC envisions to nurture knowledge, skills, and attitude and values of the aspiring youth to enable them to become global citizens and towards that process, the institution has evolved a flexible integrated academic curriculum.

NEC introduced Outcome Based Education (OBE) and Choice Based Credit System (CBCS), which emphasized on honing the skills and knowledge of the graduates.

The Engineering curriculum is revised with an objective to fill the gaps in the existing curriculum with reference to skill development. The revised curriculum underwent a reorganization making the engineering education enshrined with skill development ecosystem to suit the industry's needs and to ensure the graduates employability.

The curriculum mandates students to take up five skill courses which are relevant to the industry from second year onwards, two basic level skill courses, one on soft skills and other two on advanced level skill courses. The students are also given the option of choosing between skill courses offered by the college and a certificate course offered by industry, a professional body, APSSDC or any other accredited body.

Another major change brought in the curriculum is the introduction of B.Tech with Honors or a B.Tech. with a Minor. This is to give an opportunity for the fast learners to earn additional credits either in the same domain or in a related domain, making them more proficient in their chosen field of discipline or be a graduate with multidisciplinary knowledge and job ready skills.

1. PROGRAMS OFFERED BY THE COLLEGE

Narasaraopeta Engineering College (NEC) offers a 4-year (8 semesters) **Bachelor of Technology** (B.Tech.) degree programme, under Choice Based Credit System (CBCS) for the following branches of Engineering.

S. No.	Name of the Program	Program Code
1.	Civil Engineering	01
2.	Electrical and Electronics Engineering	02
3.	Mechanical Engineering	03
4.	Electronics and Communication Engineering	04
5.	Computer Science and Engineering	05
6.	Information Technology	12
7.	CSE (Artificial Intelligence)	43

2. ELIGIBILITY FOR ADMISSION

The total seats available as per the approved intake are grouped into two categories viz. category A and Category B with a ratio of 70:30 as per the state government guidelines vide G.O No.52.

The admissions for category A and B seats shall be as per the guidelines of Andhra Pradesh State Council for Higher Education (APSCHE) in consonance with government reservation policy.

- a. Under Category A: 70% of the seats are filled through EAMCET counselling.
- b. Under Category B: 30% seats are filled based on 10+2 merits in compliance with guidelines of APSCHE

Eligibility for Admission - Under Lateral Entry Scheme (LES)

Students with diploma qualification have an option of direct admission into 2nd year B. Tech. (Lateral Entry Scheme). Under this scheme 10% seats of sanctioned intake will be available in each course as supernumerary seats. Admissions to this three-year B Tech later entry Programme will be through ECET. The maximum period to complete B. Tech. under lateral entry scheme is six consecutive academic years from the date of joining.

3. AWARD OF THE DEGREE:

For Regular and LES students

A student will be declared eligible for the award of B. Tech. degree if he/she fulfils the following:

- (a) Pursues a course of study in not less than four and not more than eight academic years for regular students. For LES students, pursue a course of study for not less than three academic years and not more than six academic years counted from the academic year of admission.
- (b) He/she shall forfeit their seat in B. Tech course and their admission stands cancelled after eight academic years for regular students and six academic years for LES students starting from the academic year of admission.
- (c) Registers for 160 credits and must secure all the 160 credits for Regular students. Registers for 121 credits and must secure all the 121 credits for LES students
- (d) A student shall be eligible for the award of B.Tech degree with Honors or Minor if he/she earns 20 credits in addition to the 160/121 credits. A student shall be permitted to register either for Honors or for Minor and not for both simultaneously.

Academic Calendar

For all the eight/six semesters a common academic calendar shall be followed in each semester by having sixteen weeks of instruction, one week for the conduct of practical exams and with two weeks for theory examinations. Dates for registration, sessional and end semester examinations shall be notified in the academic calendar of every semester. The schedule for the conduct of all the curricular and co-curricular activities shall be notified in the planner.

4. Assigning of Credits:

- 1 Hr. Lecture (L) per week - 1 credit
- 1 Hr. Tutorial (T) per week - 1 credit
- 1 Hr. Practical (P) per week - 0.5 credits
- 2 Hours Practical (Lab)/week - 1 credit

5. There shall be mandatory student induction program for freshers, with a three-week duration before the commencement of first semester. Physical activity, Creative Arts, Universal Human Values, Literary, Proficiency Modules, Lectures by Eminent People, Visits to local Areas, Familiarization to Dept./Branch & Innovations etc., shall be included in the guidelines issued by AICTE

6. All undergraduate students shall register for NCC/NSS activities. A student will be required to participate in an activity for two hours in a week during second and third semesters. Grade shall be awarded as Satisfactory or Unsatisfactory in the mark sheet on the basis of participation, attendance, performance and behaviour. If a student gets an unsatisfactory Grade, he/she shall repeat the above activity in the subsequent years, in order to complete the degree requirements.

7. Courses like Environmental Sciences, Universal Human Values, Ethics, Indian Constitution, Essence of Indian Traditional Knowledge etc., shall be included in the curriculum as non-credit mandatory courses. Environmental Sciences is to be offered compulsorily as mandatory course for all branches. A student has to secure 40% of the marks allotted in the internal evaluation for passing the course. No marks or letter grade shall be allotted for all mandatory non-credit courses.

8. There shall be 05 Professional Elective courses and 04 Open Elective courses. All the Professional & Open Elective courses shall be offered for 03 credits, wherever lab component is involved it shall be (2-0-2) and without lab component it shall be (3-0-0) or (2-1-0) and for all minors /honors, it shall be (4-0-0). If a course comes with a lab component, that component has to be

cleared separately. The concerned BOS shall explore the possibility of introducing virtual labs for such courses with lab component.

9. All Open Electives are offered to students of all branches in general. However, a student shall choose an open Elective from the list in such a manner that he/she has not studied the same course in any form during the Programme.

10. A student shall be permitted to pursue up to a maximum of two elective courses under MOOCs during the Programme. Attendance will not be monitored for MOOC courses. Student has to pursue and acquire a certificate for a MOOC course only from the organizations/agencies approved by the BoS in order to earn the 3 credits. The Head of the department shall notify the list of such courses at the beginning of the semester.

11. The college shall invite registration forms from the students at the beginning of the semester for offering professional and open elective courses. There shall be a limit on the minimum and maximum number of registrations based on class/section strength.

12. Students shall undergo mandatory summer internships for a minimum of six weeks duration at the end of second and third year of the Programme. There shall also be mandatory full internship in the final semester of the Programme along with the project work.

13. There shall be 05 skill-oriented courses offered during III to VII semesters. Among the five skill courses, four courses shall focus on the basic and advanced skills related to the domain courses and the remaining one shall be a soft skills course.

14. Under graduate Degree with Honors/Minor shall be issued by the Institute to the students who fulfil all the academic eligibility requirements for the B. Tech program and Honors/Minor program. The objective is to provide additional learning opportunities to academically motivated students.

15. Assessment: The performance of a student in each semester shall be evaluated subject wise with a maximum of 100 marks for theory, 50 marks for practical subject. The distribution shall be 30% marks for Internal Evaluation and 70% marks for the End Semester Examinations. A student has to secure not less than 35% of marks in the end semester examination and minimum 40% of marks in the sum total of internal and end semester examination marks to earn the credits allotted to each course.

DISTRIBUTION AND WEIGHTAGE OF MARKS

The performance of a student in each semester shall be evaluated subject – wise with a maximum of 100 marks for Theory, 50 marks for Practical Subject / Mini Project and 50 marks for Practical Training / Internship. The Project Work shall be evaluated for 200 marks.

THEORY

For all theory subjects consisting of 5 units in each subject, the assessment shall be for 30 marks through internal evaluation and 70 marks through external end semester examination of 3 hours duration.

INTERNAL EVALUATION

Internal evaluation is based on two **Cycle** examinations. Each **Cycle** consists of three components.

1) **Assignment Test – 1 (A1):**

A1 will be conducted after the completion of 1st unit of syllabus. 5 or 6 questions will be given to students before 1 week of the commencement of the test. On the day of test each student will be given two questions at random. A1 will be evaluated for 05 marks.

2) **Quiz - 1(Q1):**

After the first two and half Units of syllabus is over along with the descriptive test, online quiz test will be conducted for 20 marks and scaled down to 10 marks.

3) **Descriptive Test – 1(D1):**

Along with the Q1, a descriptive test will be conducted for 25 marks and scaled down to 15 marks. One 10 marks question from unit 1, one 10 marks question from unit 2, and one 5 marks question from first half of 3rd unit will be given.

Cycle–I final marks = A1 (05 marks) + Q1 (10 marks) + D1 (15 marks) = 30 marks

In the similar manner, Cycle–II Examination will be conducted as follows:

A2 test will be conducted after 3.5 units of syllabus (covering syllabus from 2.5 to 3.5 units)
Q2 and D2 will be conducted after 5th unit is over. For D2, one 5 marks question will be given from second half of third unit, two 10 marks questions will be given each from units 4 and 5.

Cycle–II final marks = A2 + Q2 + D2 = 30 Marks.

Final internal marks will be computed as **80 % of best cycle marks + 20% of least cycle marks.**

EXTERNAL EVALUATION

External theory examination Question Paper will have the following format

PART-A (5 X 4 Marks = 20 Marks)

Answer ALL questions

Five 4-Marks Questions from each 5 Units

PART-B (5 X 10 marks = 50 marks)

Two questions will be given from each unit of syllabus with internal choice of one question.

PRACTICALS

INTERNAL EVALUATION

There shall be continuous evaluation during the semester for 15 internal marks.

The internal marks shall be awarded as follows:

- i) Day to day performance: Record (2M) + Experiment (2M) + Viva (1M) - 05 Marks
 - ii) Internal Lab Test : 10 Marks
- Total = i + ii = 05 + 10 = 15 Marks.

EXTERNAL EVALUATION

For practical subjects there shall be an external examination at the end of the semester for 35 marks in the presence of external examiner. The examination duration is 3 hours.

DRAWING SUBJECTS

For the subject having design and / or drawing, (such as Engineering Graphics, Engineering Drawing, Machine Drawing etc.,) and estimation, the distribution shall be 30 marks for Internal Evaluation and 70 marks for End Examination.

The 30 internal marks will be evaluated as follows:

Internal Tests : 15 marks. (1½ hour duration)
Day – to – day work: 15 marks (evaluation of charts)

In the internal test, 3 questions will be given to the student and he has to answer all the three questions (3x05 M = 15M)

There shall be two internal tests in a semester. The sum of 80% of the best and 20% of the least of two internal tests shall be considered for the award of internal marks.

The syllabus for the subject “**Machine drawing using Auto CAD**” consists of two major portions:

1. Unit I to III – Conventional drawing pattern.
2. Unit IV to VI – Computer lab pattern using any drafting packages

The distribution of internal and external marks is 30 and 70 marks respectively.

Internal Evaluation: Max Marks: 30

The total internal evaluation marks are distributed in the following two components:

1. Day-to-day work : 15 Marks (Evaluation of Charts)
2. Descriptive Test : 15 Marks

Cycle-I Examination – Conventional drawing pattern

In Cycle-I examination the 30 marks will be awarded as follows:

Day-to-day evaluation	- 15 Marks
Descriptive Test	- 15 Marks

In the Descriptive Test of duration 2 hours, 3 questions will be given to the student and he has to answer all the three questions (3x05M = 15M).

Cycle-II Examination – Computer lab pattern using any drafting packages

for duration of 2 hours.

In Cycle-II examination the 30 marks will be awarded as follows:

Record	- 10 Marks
Execution	- 10 Marks
Paper Work	- 10 Marks

Of two cycle examinations conducted during the semester, sum of 80% of the best and 20% of the least of two cycle examinations shall be considered for the award of internal marks.

End semester Examination (Total Duration: 4 hours, Max, marks: 70)

Conventional drawing pattern (Duration: 2 Hours, Marks: 35)

Computer lab pattern using any drafting packages (Duration: 2 Hours, Max:35)

(Note: Both Conventional drawing pattern and Computer lab pattern using any drafting packages are compulsory and are to be conducted in separate sessions)

PASS MARK CRITERIA

A student shall be deemed to have satisfied the pass mark, if he secures not less than 35% of marks in the end examinations and a minimum of 40% of marks in the sum total of the internal evaluation and end examination taken together as detailed below.

On passing a course of a program, the student shall earn the credits as assigned to that course.

S.No	Category of Subject	Max. Marks	Internal Marks	External Marks	External pass %	External pass mark	Over all pass %	Over all pass mark
1	Theory/ Drawing	100	30	70	35	25	40	40
2	Practical	50	15	35	35	12	40	20

16. Attendance Requirements:

- i. A student shall be eligible to appear for end semester examinations if he/she acquires a minimum of 75% of attendance in aggregate of all the subjects in a semester.
- ii. Shortage of Attendance below 65% in aggregate shall in NO case be condoned.
- iii. Condonation for shortage of attendance in aggregate up to 10% (65% and above and below 75%) in each semester may be granted by the College Academic Committee.
- v. Students whose shortage of attendance is not condoned in any semester are not eligible to take their end semester examination of that class and their registration shall stand cancelled.
- vi. A student will not be promoted to the next semester unless he satisfies the attendance requirements of the present semester, as applicable. They may seek readmission for that semester when offered next.
- vii. A stipulated fee shall be payable towards condonation of shortage of attendance to the college. (a) A student is eligible to write the end semester examinations if he acquires a minimum of 50% in each subject and 75% of attendance in aggregate of all the subjects.

18. Promotion Rules:

- a) A student shall be promoted from first year to second year if he fulfils the minimum attendance requirements.
- b) A student will be promoted from II year to III year if he fulfils the academic requirement of 40% of credits up to II year II-Semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in II year II semester.
- c) A student shall be promoted from III year to IV year if he fulfils the academic requirements of 40% of the credits up to III year II semester from all the examinations, whether or not the candidate takes the examinations and secures prescribed minimum attendance in III year II semester.

19. Grading:

After each subject is evaluated for 100 marks, the marks obtained in each subject will be converted to a corresponding letter grade as given below, depending on the range in which the marks obtained by the student fall.

Marks Range	Level	Letter Grade	Grade Point
≥ 90	Outstanding	A+	10
80-89	Excellent	A	9
70-79	Very Good	B	8
60-69	Good	C	7
50-59	Fair	D	6
40-49	Satisfactory	E	5
< 40	Fail	F	0
-	Absent	AB	0
-	Malpractice	MP	-

Calculation of Semester Grade Point Average (SGPA) and Cumulative Grade Point Average (CGPA):

- i. The Semester Grade Point Average (SGPA) is the ratio of sum of the product of the number of credits with the grade points scored by a student in all the courses taken by a student and the sum of the number of credits of all the courses undergone by a student, i.e.

$$SGPA = \frac{\sum (C_i \times G_i)}{\sum C_i}$$

Where, C_i is the number of credits of the i^{th} subject and G_i is the grade point scored by the student in the i^{th} course

- ii. The Cumulative Grade Point Average (CGPA) will be computed in the same manner taking into account all the courses undergone by a student over all the semesters of a program, i.e.

$$CGPA = \frac{\sum (C_i \times S_i)}{\sum C_i}$$

Where 'S_i' is the SGPA of the i^{th} semester and C_i is the total number of credits in that semester

- iii. Both SGPA and CGPA shall be rounded off to 2 decimal points and reported in the transcripts.
- iv. SGPA & CGPA will be calculated for those candidates who have passed all the subjects in that or up to that semester respectively.
- v. *Grade Point*: It is a numerical weight allotted to each letter grade on a 10-point scale.
- vi. *Letter Grade*: It is an index of the performance of students in a said course. Grades are denoted by letters A+, A, B, C, D, E and F.

- vii. As per AICTE regulations, conversion of CGPA into equivalent percentage as follows:

$$\text{Equivalent Percentage} = (\text{CGPA} - 0.75) \times 10$$

Award of Class:

After a student has satisfied the requirements prescribed for the completion of the program and is eligible for the award of B. Tech. degree, he/she shall be placed in one of the following:

Class Awarded	CGPA Secured
First Class with Distinction	≥ 7.75 (With No subject failures)
First Class	≥ 6.75 (With subject failures)
Second Class	≥ 5.75
Pass Class	≥ 4.75 & < 5.75
FAIL	< 4.75

20. Gap - Year:

Gap Year – concept of Student Entrepreneur in Residence shall be introduced and outstanding students who wish to pursue entrepreneurship are allowed to take a break of one year at any time after I year/II year/III year to pursue entrepreneurship full time. This period shall be counted for the maximum time for graduation. An evaluation committee at institute level shall be constituted to evaluate the proposal submitted by the student and the committee shall decide on permitting the student for availing the Gap Year.

REVALUATION

1. Student can submit the application for revaluation evaluation, along with the prescribed fee for revaluation evaluation of his answer script(s) of theory subject(s) as per the notification issued by the Controller of Examinations.
2. The Controller of Examinations shall arrange for revaluation of such answer script(s).
3. An evaluator, other than the first evaluator shall reevaluate the answer script(s).

MINIMUM INSTRUCTION DAYS

The minimum instruction days for each semester shall be 90 working days.

There shall be no branch transfer after the completion of admission process.

WITHHOLDING OF RESULTS

If the student has not paid the dues, if any, to the college or if any case of indiscipline is pending against him, the result of such student will be kept withheld. His degree will be withheld in such cases.

TRANSITORY REGULATIONS

Discontinued or detained candidates are eligible for readmission as and when next offered. A candidate, who is detained or discontinued in a semester, on readmission shall be required to do all the subjects in the curriculum prescribed for the batch of students in which the student joins subsequently. However, exemption will be given to those candidates who have already passed such subjects in the earlier semester(s) he was originally admitted into and substitute subjects are offered in place of them as decided by the Board of Studies. However, the decision of the Board of Studies will be final.

A student who is following JNTUK curriculum and detained due to shortage of attendance at the end of the first semester of first year shall join the autonomous batch of first year first semester. Such students shall study all the subjects prescribed for the batch in which the student joins and considered on par with regular candidates of Autonomous stream and will be governed by the autonomous regulations.

A student who is following JNTUK curriculum, detained due to lack of credits or shortage of attendance at the end of the second semester of first year or at the subsequent semesters shall join with the autonomous batch in the appropriate semester. Such candidates shall be required to pass in all the subjects in the program prescribed by the Board of Studies concerned for that batch of students from that semester onwards to be eligible for the award of degree. However, exemption will be given in the subjects of the semester(s) of the batch which he had passed earlier and substitute subjects will be offered in place of them as decided by the Board of Studies. The student has to clear all his backlog subjects up to previous semester by appearing for the supplementary examinations conducted by JNTUK for the award of degree will be sum of the credits up to previous semester under JNTUK regulations and the credits prescribed for the semester in which a candidate seeks

readmission and subsequent semesters under the autonomous stream. The class will be awarded based on the academic performance of a student in the autonomous pattern.

Transfer candidates (from non-autonomous college affiliated to JNTUK)

A student who is following JNTUK curriculum, transferred from other college to this college in second year first semester or subsequent semesters shall join with the autonomous batch in the appropriate semester. Such candidates shall be required to pass in all the subjects in the program prescribed by the Board of Studies concerned for that batch of students from that semester onwards to be eligible for the award of degree. However, exemption will be given in the subjects of the semester(s) of the batch which he had passed earlier and substitute subjects are offered in their place as decided by the Board of Studies. The student has to clear all his backlog subjects up to previous semester by appearing for the supplementary examinations conducted by JNTUK for the award of degree. The total number of credits to be secured for the award of the degree will be the sum of the credits up to previous semester under JNTUK regulations and the credits prescribed for the semester in which a candidate joined after transfer and subsequent semesters under the autonomous stream. The class will be awarded based on the academic performance of a student in the autonomous pattern.

Transfer candidates (from an autonomous college affiliated to JNTUK)

A student who has secured the required credits up to previous semester as per the regulations of other autonomous institutions shall also be permitted to be transferred to this college.

A student who is transferred from the other autonomous colleges to this college in second year first semester or subsequent semesters shall join with the autonomous batch in the appropriate semester. Such candidates shall be required to pass in all the subjects in the program prescribed by the Board of Studies concerned for that batch of students from that semester onwards to be eligible for the award of degree.

However, exemption will be given in the subjects of the semester(s) of the batch which he had passed earlier and substitute subjects are offered in their place as decided by the Board of studies.

The total number of credits to be secured for the award of the degree will be the sum of the credits up to previous semester as per the regulations of the college from which he has transferred and the credits prescribed for the semester in which a candidate joined after transfer and subsequent

semesters under the autonomous stream. The class will be awarded based on the academic performance of a student in the autonomous pattern.

Scope

1. The academic regulations should be read as a whole, for the purpose of any interpretation.
2. In case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Academic Council is final.
3. The college may change or amend the academic regulations, course structure or syllabi at any time, and the changes or amendments made shall be applicable to all students with effect from the date notified by the College Authorities.

MALPRACTICES RULES

DISCIPLINARY ACTION FOR / IMPROPER CONDUCT IN EXAMINATIONS

- The Principal shall refer the cases of Malpractices in Internal Assessment Test and Semester end examinations to a malpractice prevention committee constituted by him for the purpose. Such committee shall follow the approved levels of punishment. The Principal shall take necessary action against the students based on the recommendations of the committee.
- Any action by the candidate trying to get undue advantage in the performance or trying to help another, or derive the same through unfair means is punishable according to the provisions contained hereunder:

	Nature of Malpractices/ Improper conduct	Punishment
	<i>If the candidate:</i>	
1(a)	Possesses or keeps accessible in examination hall, any paper, note book, programmable calculators, Cell phones, pager, palm computers or any other form of material concerned with or related to the subject of the examination (theory or practical) in which he is appearing but has not made use of (material shall include any marks on the body of the candidate which can be used as an aid in the subject of the examination).	Expulsion from the examination hall and cancellation of the performance in that subject only.

1(b)	Gives assistance or guidance or receives it from any other candidate orally or by any other body language methods or communicates through cell phones with any candidate or persons in or outside the exam hall in respect of any matter.	Expulsion from the examination hall and cancellation of the performance in that subject only of all the candidates involved. In case of an outsider, he will be handed over to the police and a case is registered against him.
2.	Has copied in the examination hall from any paper, book, programmable calculators, palm computers or any other form of material relevant to the subject of the examination (theory or practical) in which the candidate is appearing.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted to appear for the remaining examinations of the subjects of that Semester/year. The Hall Ticket of the candidate is to be cancelled and sent to the college.
3.	Impersonates any other candidate in connection with the examination.	The candidate who has impersonated shall be expelled from examination hall. The candidate is also debarred and forfeits the seat. The performance of the original candidate, who has been impersonated, shall be cancelled in all the subjects of the examination (including practicals and to be allowed to appear for examinations of the remaining subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all college examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat. If the imposter is an outsider, he will be handed over to the police and a case is registered against him.
4.	Smuggles in the Answer book or additional sheet or takes out or arranges to send out the question paper during the examination or answer book or additional sheet, during or after the examination.	Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all college examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.
5.	Uses objectionable, abusive or offensive language in the answer paper or in letters to the examiners or writes to the examiner requesting him to award pass marks.	Cancellation of the performance in that subject.
6.	Refuses to obey the orders of the Chief Superintendent/Assistant	In case of students of the college, they shall be expelled from examination halls and cancellation of

	<p>Superintendent /any officer on duty or misbehaves or creates disturbance of any kind in and around the examination hall or organizes a walk out or instigates others to walk out, or threatens the officer-in charge or any person on duty in or outside the examination hall of any injury to his person or to any of his relations whether by words, either spoken or written or by signs or by visible representation, assaults the officer-in-charge, or any person on duty in or outside the examination hall or any of his relations, or indulges in any other act of misconduct or mischief which result in damage to or destruction of property in the examination hall or any part of the college campus or engages in any other act which in the opinion of the officer on duty amounts to use of unfair means or misconduct or has the tendency to disrupt the orderly conduct of the examination.</p>	<p>their performance in that subject and all other subjects the candidate(s) has (have) already appeared and shall not be permitted to appear for the remaining examinations of the subjects of that semester/year. The candidates also are debarred and forfeit their seats. In case of outsiders, they will be handed over to the police and a police case is registered against them.</p>
7.	<p>Leaves the exam hall taking away answer script or intentionally tears of the script or any part thereof inside or outside the examination hall.</p>	<p>Expulsion from the examination hall and cancellation of performance in that subject and all the other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred for two consecutive semesters from class work and all college examinations. The continuation of the course by the candidate is subject to the academic regulations in connection with forfeiture of seat.</p>
8.	<p>Possess any lethal weapon or firearm in the examination hall.</p>	<p>Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat.</p>
9.	<p>If student of the college, who is not a candidate for the particular examination or any person not connected with the college indulges in any malpractice or</p>	<p>Student of the college expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and</p>

	improper conduct mentioned in clause 6 to 8.	project work and shall not be permitted for the remaining examinations of the subjects of that semester/year. The candidate is also debarred and forfeits the seat. Person(s) who do not belong to the college will be handed over to police and, a police case will be registered against them.
10.	Comes in a drunken condition to the examination hall.	Expulsion from the examination hall and cancellation of the performance in that subject and all other subjects the candidate has already appeared including practical examinations and project work and shall not be permitted for the remaining examinations of the subjects of that semester/year.
11.	Copying detected on the basis of internal evidence, such as, during valuation or during special scrutiny.	Cancellation of the performance in that subject and all other subjects the candidate has appeared including practical examinations and project work of that semester/year examinations.
12.	If any malpractice is detected which is not covered in the above clauses 1 to 11 shall be reported to the college for further action to award suitable punishment.	

OTHER MATTERS:

1. Physically challenged candidates who have availed additional examination time and a scribe during their intermediate / EAMCET examinations will be given similar concessions on production of relevant proof / documents.
2. The Principal shall deal in an appropriate manner with any academic problem which is not covered under these rules and regulations, in consultation with the Heads of the departments and subsequently such actions shall be placed before the Academic Council for ratification. Any emergency modification of regulation, approved in the meetings of the Heads of the departments shall be reported to the Academic Council for ratification.

GENERAL:

1. The academic council may, from time to time, revise, amend or change the regulations, schemes of examinations and / or syllabi.
2. Where ever the words "he" "him" "his", occur in the regulations, they include "she", "her", "hers".
3. The academic regulation should be read as a whole for the purpose of any interpretation.
4. In the case of any doubt or ambiguity in the interpretation of the above rules, the decision of the Principal is final.

R20CC1101	TECHNICAL AND COMMUNICATIVE ENGLISH - I (Common to All Branches)						

COURSE OBJECTIVES

1. To enable the engineering students develop their basic communication skills in English for academic and social purposes.
2. To equip the students with appropriate oral and written communication skills.
3. To inculcate the skills of listening, reading and critical thinking.
4. To integrate English Language learning with employability skills and training.
5. To enhance the students' proficiency in reading skills enabling them meet the academic demands of their course.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO1: Infer explicit and implicit meaning of a text, recognize key passages; raise questions and summarize it.
- CO2: Compose paragraphs, essays, emails, letters, reports, resume and transfer information into tables, Pie and bar diagrams.
- CO3: Build grammatically correct sentences using a variety of sentence structures.
- CO4: Enhance word power and usage of lexicons.

TEACHING METHODOLOGY

The methodology of teaching will be chalk and talk, PPT, audio-visual, flipped class and activity based teaching.

UNIT-I: HOURS OF INSTRUCTION PER UNIT: 8

1. A Drawer full of Happiness

- a. **Listening** : Dialogues, Task based listening activities.
- b. **Speaking** : Asking and answering general questions.
- c. **Reading** : Skimming, Scanning.
- d. **Writing** : Punctuations, Paragraphs.
- e. **Grammar and Vocabulary** : Nouns, Adjuncts,
GRE Vocabulary,
Technical Vocabulary.

UNIT-II: HOURS OF INSTRUCTION PER UNIT: 8

2. Nehru's Letter to daughter Indira on her Birthday

- a. **Listening** : Individual and pair based listening to the audio track.
- b. **Speaking** : Discussion in pairs / small groups on specific topics.
- c. **Reading** : Identifying sequence of ideas; recognising verbal techniques.
- d. **Writing** : Summarising, Paraphrasing.

- e. **Grammar and Vocabulary** : Articles, Adjectives, Prepositions
Verbal Competence,
Synonyms and Antonyms,
Analogy,
GRE Vocabulary,
Technical Vocabulary.

UNIT-III: HOURS OF INSTRUCTION PER UNIT: 8

3. Stephen Hawking- Positivity ‘Benchmark’

- a. **Listening** : Listening for global comprehension and summarising.
b. **Speaking** : Discussing specific topics in pairs (or) small groups and reporting the discussion, Complaining, Apologising.
c. **Reading** : Reading between the lines, Critical reading for evaluation.
d. **Writing** : Official Letter writing, E-Mail etiquette, General Netiquette, Covering Letter and Resume writing.
e. **Grammar and Vocabulary** : Phrasal verbs, Verbs, Tenses (Present, Past and Future),
Concord: Subject-Verb Agreement,
Verbal reason,
Using equivalents,
Word associations,
GRE Vocabulary,
Technical Vocabulary.

UNIT-IV: HOURS OF INSTRUCTION PER UNIT: 8

4. like a Tree, Unbowed: Wangari Maathai- Biography

- a. **Listening** : Making predictions while listening to conversations (or) transactional dialogues.
b. **Speaking** : Role plays for practice of conversational English in academic contexts (formal and informal) .
c. **Reading** : Information transfer (Tables, Bar Diagrams, Line Graphs, Pie Diagrams)
d. **Writing** : Interpreting visual information, Statement of Purpose (SOP)
e. **Grammar and Vocabulary** : Gender inclusive language (Gendered Noun, Gender-neutral Noun), Quantifying expressions, Adjectives, Adverbs, Degrees of comparison, GRE Vocabulary, Technical Vocabulary.

UNIT-V: HOURS OF INSTRUCTION PER UNIT: 8

5. “Stay Hungry, Stay Foolish”- Rushmi Bansal

- a. **Listening** : Identifying key terms, understanding concepts, interpreting the concepts.

- b. **Speaking** : Formal oral presentations on topics from academic contexts.
- c. **Reading** : Reading comprehension, The RAP strategy for in-depth reading, Intensive reading and extensive reading.
- d. **Writing** : Academic proposals, Poster presentation.
- e. **Grammar and Vocabulary** : Reported Speech, Reporting verbs for academic purposes, Corrections of sentences, GRE Vocabulary, Technical Vocabulary.

I B.TECH I-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	2	1	0	30	70	100	3
R20CC1102	MATRIX ALGEBRA and CALCULUS (Common to All Branches)						

COURSE OBJECTIVES

1. Understanding basic concepts of linear algebra (systems of linear equations, matrix calculus).
2. To become proficiency in solving computational problems of linear algebra.
3. To acquire knowledge on mean value theorems in calculus.
4. Familiarization about the techniques in calculus and multivariate analysis.

COURSE OUTCOMES

Upon successful completion of the course, the students should be able to

- CO 1: Solve the system of linear equations.
 CO 2: Analyse the applications of matrices in various fields and obtain Eigen values and Eigenvectors.
 CO 3: Relate the results of mean value theorems in calculus to Engineering problems.
 CO 4: Apply the functions of several variables to evaluate the rates of change with respect to time and space variables in engineering.
 CO 5: Identify the area and volume by interlinking them to appropriate double and triple integrals.

UNIT-I: LINEAR SYSTEMS OF EQUATIONS

Rank of a matrix - Echelon form, Normal form, Solution of linear systems, Direct Methods, Gauss elimination, Gauss Jordan and Gauss Seidal Methods. Solutions of linear simultaneous equations: LU decomposition.

Application: Finding the current in a electrical circuit, Traffic flow

UNIT – II: EIGENVALUES AND EIGENVECTORS

Eigenvalues, Eigenvectors, Properties, Cayley - Hamilton Theorem(without proof), Quadratic forms, Reduction of quadratic form to canonical form, Rank, Positive definite, negative definite, semi definite, index, signature.

Application: Finding powers and inverse of a square matrix using Cayley Hamilton's Theorem.

UNIT – III: MEAN VALUE THEOREMS

Review on limits and continuity, Mean Value theorems (without proofs): Rolle's Theorem, Lagrange's theorem, Cauchy's theorem, Taylor's (Generalized mean value) theorem, increasing and decreasing functions, Maxima and minima of function of single variable.

UNIT- IV: PARTIAL DIFFERENTIATION

Function of two or more variables, Partial derivatives, Total derivatives, change of variables, Jacobian - functional dependence, Taylor's theorem for Two variables. Maxima and Minima of functions of two variables, Lagrange's method of undetermined multipliers.

UNIT-V: MULTIPLE INTEGRALS

Double and triple integrals, Change of Variables, Change of order of Integration, volume.
Application: Momenta of Inertia.

I B.TECH I-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	3	0	0	30	70	100	3
R20EE1109	BASICS IN MECHANICAL AND CIVIL ENGINEERING (for EEE)						

COURSE OBJECTIVES

1. To provide required knowledge on joining, forming, welding and power transmissions.
2. To provide required knowledge on power plants and gas turbines.
3. To impart the overview of Civil Engineering and its measuring techniques.
4. To familiarize the materials used in Civil Engineering.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO 1: Illustrate the types of power plants and applications
- CO 2: Estimate the flow parameters in various devices
- CO 3: Understand the basics elements and measurements of civil engineering.
- CO 4: Explain the usage and proper selection of construction materials.

UNIT-I: POWER PLANT ENGINEERING

Introduction, types of power plants, Steam power plant-Layout, applications. Diesel engine power plant-Layout, applications, Gas turbine power plant-simple gas turbine, components of a gas turbine, Types of fuels.

UNIT-II: POWER TRANSMISSION

Different types of power transmission-belt drives, rope drives, chain drives. Gears:-Classification of gears, applications.

UNIT-III: IMPACT OF JETS AND PUMPS

Impulse momentum equation, Impact of Jet on stationary and moving vanes (flat and curved). Pumps: Types of pumps, Centrifugal pumps: Main components, Working principle, Reciprocating Pumps: Components, Working principle

UNITS-1V: INTRODUCTION TO CIVIL ENGINEERING

Civil Engineering contributions to the welfare of Society-Specialized sub disciplines in Civil Engineering – Structural, Construction, Geotechnical, Environmental, Transportation and Water Resources Engineering- Classification of structures, buildings, towers, chimneys, bridges, water tanks, roads, railways.

Surveying: Objects-classification-principles-measurements of distances-angles-leveling-determination of areas-contours-examples.

UNIT- V: BUILDING MATERIALS

Stones – Classification of stones, Bricks – Composition and Classification and Cement - Basic ingredients, manufacturing process, grades of cement; Aggregates – fine aggregates, coarse aggregates, Timber, steel – structural steel, steel as a reinforcement

I B.TECH I-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	3	0	0	30	70	100	3
R20CC1105	PROBLEM SOLVING USING C (Common to All Branches)						

COURSE OBJECTIVE

1. To know the basic problem solving process using Flow Charts and algorithms.
2. To understand the basic concepts of control structures in C.
3. To learn concepts of arrays, functions, pointers and Dynamic memory allocation in C.
4. To use the concepts of structures, unions, files and command line arguments in C.

COURSE OUTCOMES

After completion of this course, the students would be able to:

- CO1: Develop algorithms and flow charts for simple problems.
 CO2: Utilize suitable control structures for developing code in C.
 CO3: Make use of functions and arrays in developing modular programs.
 CO4: Make use of structures and pointers to write well-structured programs.
 CO5: Make use of file Operations in C programming for a given application.

UNIT-I: INTRODUCTION TO ALGORITHMS AND PROGRAMMING LANGUAGES

Algorithm – Key features of Algorithms – Some more Algorithms – Flow Charts – Pseudo code – Programming Languages – Generation of Programming Languages – Structured Programming Language.

Introduction to C: Structure of C Program – Writing the first C Program -Compiling and Executing C Programs - Using Comments – Keywords – Identifiers – Basic Data Types in C – Variables – Constants – I/O Statements in C - Operators in C -Programming Examples – Type Conversion and Type Casting.

UNIT II: DECISION CONTROL AND LOOPING STATEMENTS

Introduction to Decision Control Statements – Conditional Branching Statements – Iterative Statements – Nested Loops – Break and Continue Statement – Goto Statement.

Functions: Introduction – using functions – Function declaration/ prototype – Function Definition – function call – return statement – Passing parameters – Scope of variables –Storage Classes – Recursive functions – Recursion vs Iteration.

UNIT III: ARRAYS

Introduction – Declaration of Arrays – Accessing elements of the Array – Storing Values in Array – Calculating the length of the Array – Operations on Array — Two Dimensional Arrays –Operations on Two Dimensional Arrays.

Strings: Introduction – Reading Strings – Writing Strings – String Manipulation functions -Array of Strings.

UNIT IV: POINTERS

Introduction to Pointers – declaring Pointer Variables – Pointer Expressions and Pointer Arithmetic – Null Pointers – Passing Arguments to Functions using Pointer, Dynamic Memory Allocation.

Structure, Union, and Enumerated Data Types: Introduction – Nested Structures –Arrays of Structures – Structures and Functions – Self-referential Structures – Union –Enumerated Data Types.

UNIT V: FILES

Introduction to Files – Using Files in C – Reading Data from Files – Writing Data To Files – Detecting the End-of-file – Error Handling during File Operations – Accepting Command Line Arguments – Functions for Selecting a Record Randomly - Remove –Renaming a File – Creating a Temporary File

I B.TECH I-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	1	0	4	30	70	100	3
R20EE1112	ENGINEERING DRAWING AND DESIGN						

COURSE OBJECTIVES

1. The students to use drawing instruments and to draw polygons, engineering Curves and engineering scales.
2. The students use to make orthographic projections, projections of points, simple lines and projections of the lines inclined to both the lines.
3. The students use to draw the projections of the plane inclined to both the plane.
4. The students use to draw the projections of solids and development of surfaces.
5. The students use to draw conversion of isometric views to orthographic views vice versa and to learn basic drawing commands in auto cad.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO1: **Construct** the geometrical shapes of regular polygons, Engineering Curves, and scales.
 CO2: **Illustrate** the orthographic projections, projections of points, and lines inclined to both the planes.
 CO3: **Construct** the projection of planes inclined to both the planes
 CO4: **Construct** the projection of solids for engineering applications.
 CO5: **Analyse** the conversion of isometric views to orthographic views vice versa.

UNIT– I: THE BASIC CONCEPTS IN ENGINEERING DRAWING

Introduction to engineering drawing instruments, lettering and dimensioning practice. Geometrical constructions- Constructing regular polygons by general methods.

CURVES USED IN ENGINEERING PRACTICE: Introduction to conic sections, construction of ellipse, parabola, hyperbola by eccentricity method. Construction of ellipse by - Arcs of circles Method, Concentric Circles Method and Oblong Method, and parallelogram methods.

UNIT–II: ORTHOGRAPHIC PROJECTIONS

Introduction to type of projections, first angle and third angle projections.

PROJECTION OF POINTS: Principles of orthographic projection – Convention – First angle projections, projections of points.

PROJECTIONS OF STRAIGHT LINES:

Projections of straight lines parallel to both the planes, parallel to one plane and inclined to the other plane - Projections of straight lines inclined to both the planes- determination of true lengths, angle of inclination.

UNIT–III: PROJECTIONS OF PLANES

Regular planes perpendicular/parallel to one plane and inclined to the other reference plane; inclined to both the reference planes.

UNIT-IV: PROJECTIONS OF SOLIDS

Introduction to projections of solids, types of solids: prisms, pyramids, cones and cylinders –simple positions and the axis inclined to one of the plane.

UNIT-V: ISOMETRIC AND ORTHOGRAPHIC PROJECTIONS

Introduction of isometric views, isometric projections and orthographic projections. Conversion of isometric views to orthographic views and orthographic views to isometric views.

INTRODUCTION TO AUTO CAD: Practice on draw, edit and modify commands using auto CAD.

TEXT BOOKS

1. Engineering Drawing by N.D. Butt, Chariot Publications.
2. Engineering Drawing by K.L.Narayana and P. Kanniah, Scitech Publishers.
3. Engineering Drawing and Graphics by K.Venu gopal, New age international Publishers.

R20CC11L1	SOFT SKILLS and COMMUNICATION SKILLS LAB (Common to all branches)						

COURSE OBJECTIVES

1. To build confidence in the students to communicate effectively in English.
2. To strengthen the oral communication skills to enable them to interact with the people in various social situations.
3. To enable the learners improve pronunciation with the knowledge of phonetics.
4. To provide exposure to students to soft skills like Goal Setting, Time Management, Interpersonal Skills, and Intra Personal Skills.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO1: Communicate effectively with good pronunciation, overcoming mother tongue influence in academic and professional environment.
- CO 2: Listen and comprehend several accents of English Language
- CO 3: Take part in various conversations/discourses using formal and informal expressions.
- CO 4: Adapt soft skills successfully in personal and professional life.

UNIT– I

1. Introduction to Phonetics.
2. Listening - TEDx Talks (https://www.ted.com/talks/ashweetha_shetty_how-education-helped-me-rewrite-my-life?language-en#t-623369)
3. Self-Introduction

UNIT–II

1. Pronunciation Rules and Common Errors in Pronunciation.
2. Listening -TEDx Talks(https://www.youtube.com/watch?v=Dk20-E0yx_s)
3. Role Play

UNIT–III

1. Situational Dialogues (Inviting, Accepting and Declining Invitations)
2. Listening - TEDx Talks (<https://www.youtube.com/watch?v=lgAnj6r1O48>)
3. JAM

UNIT-IV

1. Situational Dialogues (Commands, Instructions and Requests)
2. Listening -TEDx Talks(<https://youtu.be/SKvMxZ284AA>)
3. Telephonic Etiquette.

UNIT-V

1. Time Management.
2. Goal Setting.
3. Interpersonal Skills and Intra personal skills.

	0	0	3	15	35	50	1.5
R20EE11L6	BASICS IN MECHANICAL AND CIVIL ENGINEERING LAB						

COURSE OBJECTIVE

1. To impart practical exposure on the performance evaluation methods of various flow measuring equipment and hydraulic turbines and pumps.
2. To provide knowledge on various heat engines and compressors
3. To enable the students the basic principles of surveying.
4. Ability to communicate effectively the mechanical properties of materials.

COURSE OUTCOMES

After completion of the course students are able to

- CO 1: **Estimate** the discharge through flow measurement device
 CO 2: **Solve** the flow equations to estimate performance of the turbines and pumps
 CO 3: **Determine** the calorific value of fuel and to perform tests on engines and compressor
 CO 4: **Classify** and understand the applications of basic building materials.
 CO 5: **Apply** the basic principles of engineering surveying, linear and Angular measurements.

LIST OF EXPERIMENTS

Any Ten experiments from the following list are required to be conducted

1. Calibration of Venturimeter.
2. Performance Test on PeltonWheel.
3. Performance Test on FrancisTurbine.
4. Performance Test on Single Stage CentrifugalPump.
5. Performance Test on ReciprocatingPump.
6. Determination of Calorific Value of a fuel using Bomb Calorimeter
7. Performance Test on 4-Stroke Petrol Engine
8. Measurement the distance between two points using Chain and tape.
9. Measurement of angles between two points using Prismatic Compass.
10. Compression test on mild steel, Brick, Wood.
11. Impact test on Mild steel (Charpy)
12. Impact test on Mild Steel (Izod)
13. Hardness tests on Ferrous metals – Brinell’s, Rockwell
14. Hardness tests on ferrous metals – Vicker’s.

VIRTUAL LAB

1. Verification of Bernoulli’s theorem
2. Closed Traverse by using Compass Surveying

I B.TECH I-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	0	0	3	15	35	50	1.5
R20CC11L2	PROBLEM SOLVING USING C LAB (Common to All Branches)						

COURSE OBJECTIVE

1. The purpose of this course is to introduce to students to the field of language. The students will be able to enhance their analyzing and problem solving skills and use the same for writing programs in C.

COURSE OUTCOMES

After completion of this C Programming Lab, students would be able to

- CO1: Study, analyze and understand logical structure of computer programming and different Constructs to develop programs in C Language.
- CO2: Compare and contrast various data types and operator precedence.
- CO3: Analyze the use of conditional and looping statements to solve problems associated with conditions and repetitions.
- CO4: Analyze simple data structures, use of pointers and dynamic memory allocation techniques.
- CO5: Make use of functions and file I/O operations in developing C Programs.

EXERCISE 1

Construct Flowcharts for the following through Raptor:

- i) Develop a calculator to convert time, distance, area, volume and temperature from one unit to another.
- ii) Calculate simple and compound interest for various parameters specified by the user.
- iii) Calculate the average of n numbers.

EXERCISE 2

- a) Write a C Program to calculate the area of triangle using the formula

$$\text{Area} = \sqrt{s * (s - a) * (s - b) * (s - c)}$$
 where $s = (a+b+c)/2$.
- b) Write a C Program to find the largest of three numbers using ternary operator.
- c) Write a C Program to swap two numbers without using a temporary variable.

EXERCISE 3

- a) Write a C program to find the roots of a quadratic equation.
- b) Write a C program, which takes two integer operands and one operator from the user, performs the operation and then prints the result. Consider the operators +, -, *, /, % and use Switch Statement.

EXERCISE 4

- a) Write a C program to find the sum of individual digits of a positive integer and find the reverse of the given number.
- b) Write a C program to generate all the prime numbers between 1 and n, where n is a value supplied by the user.

EXERCISE 5

- Write a C Program to print the multiplication table of a given number n up to a given value, where n is entered by the user.
- Write a C Program to enter a decimal number, and calculate and display the binary equivalent of that number.
- Write a C Program to check whether the given number is Armstrong number or not.

EXERCISE 6

- Write a C program to interchange the largest and smallest numbers in the array.
- Write a C program to input two m x n matrices, check the compatibility and perform addition and multiplication of them.

EXERCISE 7

- Write a C Program to find sum of following series for a given n value.

- $1+(1+2)+(1+2+3)+(1+2+3+4)+(1+2+3+4+5)+\dots+(1+2+\dots+n)$.
- $1+(2+2)+(3+3+3)+(4+4+4+4)+\dots+(n+n+n+n\dots+n)$.

- Write a C Program to display following patterns for a given n value

i.

```

  1
 2 2
3 3 3           if n =3

```

i.

```

  1
 2 2
3 3 3
 2 2
  1           if n=3.

```

EXERCISE 8

Draw a flow chart using Raptor and write C programs that use both recursive and non-recursive Functions for the following

- To find the factorial of a given integer.
- To find the GCD greatest common divisor of two given integers.

EXERCISE 9

- Write a C Program to find Fibonacci sequence.
- Write C programs illustrating call by value and call by reference concepts.

EXERCISE 10

Write C Programs for the following string operations without using the built in functions - to concatenate two strings

- To append a string to another string
- To compare two strings

EXERCISE 11

Write C Programs for the following string operations without using the built in functions

- To find whether a given string is palindrome or not
- Write a C Program to count number of occurrences of each character in a given string.
Example: if input 'APPLE' then output is 'A count 1, P count 2, L count 1, E count 1'

EXERCISE 12

Write a C program that uses functions to perform the following operations:

- i. To insert a sub-string in to given main string from a given position.
- ii. To delete n Characters from a given position in a given string.
- iii. To replace a character of string either from beginning or ending or at a specified location

EXERCISE 13

- a) Write a C Program to Implement Taylor series method
- b) Write a C Program to Implement Euler's method
- c) Write a C Program to Implement Runge Kutta method

EXERCISE 14

- a) Write C Program to reverse a string using pointers
- b) Write a C Program to compare two arrays using pointers
- c) Write a C program to swap two numbers using pointers

EXERCISE 15

- a) Write the following C Programs using Dynamic memory management functions.
 - i. Accept size of array from user then read n elements into two arrays and store sum of those two arrays in third array, display three arrays using pointers.
 - ii. User will specify data type and data to store, use generic pointer to store that data and display given input.

EXERCISE 16

Examples which explores the use of structures, union and other user defined variables

EXERCISE 17

- a) Write a C program which copies one file to another.
- b) Write a C program to count the number of characters and number of lines in a file.
- c) Write a C Program to merge two files into a third file. The names of the files must be entered using command line arguments.

EXERCISE 18

Virtual Lab: <http://cse02-iiith.vlabs.ac.in/>

Any three programs must be submitted with result from the above link.

*** At the end of the semester the student has to submit a Mini-Project on Computer Programming. The list of Mini-Projects is available in the department.**

TEXT BOOKS

1. Reema Thareja, "Programming in C", OXFORD.
2. The C programming Language by Dennis Richie and Brian Kernighan 2nd ed.

REFERENCE BOOKS

I B.TECH II-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	2	1	0	30	70	100	3
R20CC1201	DIFFERENTIAL EQUATIONS AND VECTOR CALCULUS (Common to Civil, EEE, ME and ECE)						

COURSE OBJECTIVES

1. To formulate and solve first order ordinary differential equations.
2. To solve second order differential equations of various kinds.
3. To find the solution of first order linear and non-linear partial differential equations.
4. The skills derived from the course will help the student from a necessary base to develop analytic and design concepts.

COURSE OUTCOMES

Upon successful completion of the course, the students should be able to

- CO 1: Apply first order ordinary differential equations to real life situations
- CO 2: Identify and apply suitable methods in solving the higher order differential equations.
- CO 3: Solve the partial differentiation equations.
- CO 4: Interpret the physical meaning of different operators as gradient, curl and divergence.
- CO 5: Estimate the work done against a field, circulation and flux using vector calculus.

UNIT I: DIFFERENTIAL EQUATIONS OF FIRST ORDER AND FIRST DEGREE

Linear-Bernoulli's-Exact equations and equations reducible to exact form.

Applications: Newton's Law of cooling, Law of natural growth and decay, orthogonal trajectories, Electrical circuits.

UNIT-II: LINEAR DIFFERENTIAL EQUATIONS OF HIGHER ORDER

Finding the complementary functions, Inverse operator, Rules for finding the particular integrals, Method of variation of parameters. Cauchy's and Legendre's linear equations, simultaneous linear equations with constant coefficients.

Application: L-C-R Circuit problems.

UNIT – III: FIRST ORDER PARTIAL DIFFERENTIAL EQUATIONS

Formation of partial differential equation by elimination of arbitrary constants and arbitrary functions, solutions of first order linear (Lagrange's) equations.

UNIT- IV: VECTOR DIFFERENTIATION

Scalar and vector point functions, vector operator del, del applies to scalar point functions- Gradient, del applied to vector point functions-Divergence and Curl, vector identities.

UNIT- V: VECTOR INTEGRATION

Line integral-circulation-work done, surface integral-flux, Green's theorem in the plane (without proof), Stoke's theorem (without proof), volume integral, Divergence theorem (without proof).

I B.TECH II-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	3	0	0	30	70	100	3
R20CC1205	APPLIED PHYSICS (COMMON TO ECE,EEE,CSE,ITandCAI)						

COURSE OBJECTIVES

1. To impart knowledge in basic concepts of wave optics, fiber optics, properties of solid crystal materials and magnetic materials, acoustics, superconductors.
2. To familiarize the applications of materials relevant to engineering field.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO 1: Interpret the experimental evidence of wave nature of light and interference in thin Films, Diffraction grating and Polarisation in various fields.
- CO 2: Analyse and understand various types of lasers and optical fibers.
- CO 3: Identify the crystal structures and XRD techniques.
- CO 4: Apply the magnetic materials in engineering field.
- CO 5: Identify the various applications of semiconductors in engineering field.

UNIT– I: INTERFERENCE and DIFFRACTION

Introduction -Interference in thin films by reflection – Newton’s rings, introduction to diffraction – difference between Fresnel’s and Fraunhofer diffraction - Fraunhofer diffraction at single slit (qualitative) - Diffraction grating.

Polarization: Introduction – Types of Polarization – Double refraction – Nicol’s prism-Quarter wave plate and Half Wave plate - Applications

UNIT–II: LASERS

Introduction – Characteristics of lasers – Spontaneous and Stimulated emission of radiation – Population inversion – Ruby laser – Helium Neon laser-Applications.

Fiber Optics: Introduction- Basic Structure and Principle of optical fiber - Acceptance angle – Acceptance cone - Numerical Aperture-Applications.

UNIT–III: CRYSTALLOGRAPHY

Introduction – Space lattice – Basis – Unit Cell – Lattice parameters – Bravais lattices – Crystal systems – Structures and packing fractions of SC,BCC and FCC.

X-Ray Diffraction: Directions and planes in crystals – Miller indices – Separation between successive (h k l) planes – Bragg’s law..

UNIT-IV: ELECTROMAGNETIC FIELDS

Gauss divergence theorem - Stokes theorem (Quantitative) – Fundamental laws of electromagnetism – Maxwell’s Electromagnetic Equations.

Magnetic materials: Magnetic Susceptibility- Magnetic permeability –Classification of Magnetic materials – Dia, Para, and Ferro – Hysteresis Loop- Soft and Hard magnetic materials – Applications- Superconductivity- Properties, Meissner effect - Type-I and Type-II super conductors.

UNIT-V: QUANTUM MECHANICS

Introduction –de-Broglie’s concept of Matter waves – Physical significance of wave function - Schrodinger Time Independent wave equations – Particle in a one dimensional potential box.

Semiconductor Physics: Origin of energy band formation in solids- classification of materials into conductors, semiconductors and insulators, Intrinsic and Extrinsic semiconductor- Hall Effect.

I B.TECH II-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	3	0	0	30	70	100	3
R20EE1209	ELECTRONICS DEVICES AND CIRCUITS						

COURSE OBJECTIVES

1. Understand the operation and principles of P-N diode.
2. Understand various types of Special diodes, rectifiers and filters.
3. Know the working of BJT.
4. Know the need for transistor biasing and stabilization.
5. Know the working of FET and other Transistors.

COURSE OUTCOMES

After completion of the course, students will be able to

- CO1: Use P-N diodes in electronic circuits.
 CO2: Use special diodes and rectifiers in electronic circuits.
 CO3: Explore the operation of BJT and its applications.
 CO4: Analyse the thermal stability of BJT.
 CO5: Explore the operation of FET, other transistors and their applications.

UNIT- I: PN JUNCTION DIODE CHARACTERISTICS

Insulators, Semiconductors and Metals–Classification using Energy gap, Intrinsic and Extrinsic Semiconductors. P-N Junction Diode - Formation of P-N Junction, Open Circuited P-N Junction, Biased P-N Junction - Forward Bias, Reverse Bias, Current Components in PN Junction Diode, Law of Junction, Diode Current Equation - Quantitative Analysis, V-I Characteristics of Diode - Forward Bias, Reverse Bias, Breakdown in P-N Junction Diode, Temperature Dependence on V-I Characteristics, Diode Resistance-Static Resistance, Dynamic Resistance, Reverse Resistance, Diode Capacitance - Transition Capacitance, Diffusion Capacitance, Energy Band Diagram of PN Junction Diode.

UNIT- II: SPECIAL DIODES AND RECTIFIERS

SPECIAL DIODES: Zener Diode - V-I Characteristics, Applications, Breakdown Mechanisms - Zener Breakdown and Avalanche Breakdown, Construction, Operation, Characteristics and applications of LED, LCD, Photodiode, Varactor Diode and Tunnel diode.

RECTIFIERS: Basic Rectifier setup, Half Wave Rectifier, Full Wave Rectifier, Bridge Rectifier, Inductive and Capacitive Filters, L- Section and π - Section, Derive and compare rectifier parameters with and without filter.

UNIT- III: BIPOLAR JUNCTION TRANSISTOR (BJT)

Bipolar Junction Transistor – Types, Symbols and Operation, Transistor Current Components, Transistor Equation - Relation among I_C , I_B , I_{CBO} , Transistor Configurations - CB, CE and CC, Transistor as a switch, Transistor switching times, Transistor as an Amplifier, Characteristics of Transistor in Common Base Configuration, Common Emitter and Common Collector Configurations - Input and output characteristics, Early effect, Transistor parameters, Current amplification factor, Relation among α , β , and γ , Comparison of CB, CE and CC Configurations, Punch Through/ Reach through, Typical transistor junction voltage values.

UNIT- IV: BJT BIASING AND THERMAL STABILITY

Need For Biasing, Operating Point, Load Line Analysis - D.C. Load Line, A.C. Load Line, and Biasing - Methods, Basic Stability, Fixed Bias, Collector-to-base Bias and Self Bias.

UNIT- V: FET and OTHER TRANSISTORS

FET Types and Symbols - JFET and MOSFET/IGFET, JFET: N- Channel and P-Channel Construction, Operation, Characteristics - Drain and Transfer, Parameters - Drain Resistance, Amplification factor, Transconductance, Pinch-off voltage, MOSFET - Types - Depletion MOSFET - N Channel and P Channel, Enhancement MOSFET - N-Channel and P-Channel, Construction, Operation, Characteristics - Transfer and Drain Characteristics for Depletion and Enhancement Modes, Comparison between JFET and MOSFET.

SCR- Symbol, Two-Transistor version, DIAC, TRIAC UJT - Negative Resistance Property and Applications.

2. R.L. Boylestad and Louis Nashelsky, "Electronic Devices and Circuit Theory", Pearson Publications, Eleventh Edition, 2013.

I B.TECH II-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	2	1	0	30	70	100	3
R20EE1213	ELECTRICAL CIRCUIT ANALYSIS-I						

COURSE OBJECTIVES

1. To introduce fundamental laws, basic electrical elements, sources and their characteristics.
2. To learn the concept of phase and phase relationship of basic electrical elements.
3. To impart the basic knowledge about the Resonance and coupled circuits
4. To compute electrical parameters like current, voltage and power using network theorems for AC and DC circuits.

COURSE OUTCOMES

After successful completion of this course, the students will be able to:

- CO 1: Analyze basic electrical circuits using mesh and nodal analysis.
- CO 2: Illustrate phase and phase relationship of basic electrical elements and circuits.
- CO 3: Design of tank circuit for given frequency and analyse the coupled circuits.
- CO 4: Analyze the electrical circuits using network theorems for D.C. excitation.
- CO 5: Analyze the electrical circuits using network theorems for A.C. excitation.

UNIT-I: INTRODUCTION TO ELECTRICAL CIRCUITS

Passive components and their V-I relations. Sources (dependent and independent), Ohm's Law- Kirchhoff's laws, Network reduction techniques (series, parallel, series - parallel, star- to-delta and delta-to-star transformation). Source transformation technique, nodal analysis, mesh analysis, super node and super mesh analysis for D.C. excitations.

UNIT-II: SINGLE PHASE A.C. CIRCUITS

Periodic waveforms (determination of rms, average value and form factor). Concept of phase and phase difference. Complex and polar forms of representations, steady state analysis of R, L and C circuits with sinusoidal excitation, Power Factor and its significance, Real, Reactive power and apparent Power.

UNIT-III RESONANCE AND COUPLED CIRCUITS

Series and parallel resonance - Q factor and bandwidth - Resonant frequency of a tank circuit - Coupled circuits - Self and mutual inductances - Coefficient of Coupling - Analysis of coupled circuits - Dot rule for coupled circuits - Equivalent circuit of coupled circuits - Coupled circuits in Series and Parallel.

UNIT-IV: NETWORK THEOREMS (DC EXCITATION)

Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum Power Transfer theorem, Reciprocity theorem, Millman's theorem, Tellegen's theorem and compensation theorem.

UNIT-V: NETWORK THEOREMS (AC EXCITATION)

Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum Power Transfer theorem, Reciprocity theorem, Millman's theorem, Tellegen's theorem and compensation theorem.

	3	0	0	30	70	100	3
R20EE1217	DATA STRUCTURES USING C (Common to EEE and ECE)						

COURSE OBJECTIVES

1. Comprehensive knowledge of data structures and exposure to recursive algorithms, searching and sorting techniques
2. Apply stack and queue data structures for logical operations
3. Understand Linked-list representation models in various types of applications
4. Implementation of trees in various forms, orientation on graphs, representation of graphs, graph traversals

COURSE OUTCOMES

After completion of this course the student should be able to

- CO1: Illustrate sorting and searching algorithms.
 CO2: Summarize elementary data structures such as stacks, queues and linked lists.
 CO3: Compare and contrast various forms of trees.
 CO4: Outline graph data structures and various graph traversal techniques.

UNIT – I: INTRODUCTION TO DATA STRUCTURES AND ALGORITHMS

Basic Terminology, Elementary Data Structure Organization, Classification of Data structures, Operations on Data structures, Abstract Data Type.

Recursion: Pseudocode, Recursive examples, Factorial, GCD implementation, Fibonacci numbers, Tower of Hanoi.

UNIT – II: SEARCHING AND SORTING

Introduction to Searching, Linear Search, Binary Search, Introduction to Sorting, Bubble sort, Insertion sort, Selection sort, Merge sort, Quick sort and Heap Sort.

UNIT – III: STACKS

Introduction to stacks, Array Representation of stacks, Operations on stack, Linked representation of stacks, Applications of stacks, evaluation of a postfix expression, conversion of infix expression into a postfix expression.

Queues: Introduction, Array Representation of Queues, Linked representation of Queues, Circular Queues, Applications of queues.

UNIT – IV: LINKED LISTS

Introduction, Basic terminologies, Linked lists versus Arrays, Memory allocation and De-allocation for a linked list, single linked list, Circular linked, Doubly linked list. (Searching, inserting, Deleting and displaying operations for all Linked Lists)

UNIT – V: TREES

Introduction, Basic Terminology, Types of Trees, Expression Trees, Traversing a Binary Tree, Pre-order Traversal, In-order Traversal, Post-order traversal, Level order traversal, constructing a Binary Tree from Traversals, Binary Search Trees, operations on Binary Search Trees, AVL Trees.

Graphs: Introduction, Graph Terminology, Directed Graphs, Representations of Graphs, Graph

Traversal algorithms, Breadth- First Search Algorithm, Depth-First-Search Algorithm.

TEXT BOOKS

1. Data Structures using C, Reema Thareja, Oxford, Second Edition, 2014
(UNITS: I, II, III, IV, V and VI).
2. Data Structures, 2/e, Richard F, Gilberg , Forouzan, Cengage (UNIT: I).

	0	0	3	15	35	50	1.5
R20CC12L10	APPLIED PHYSICS LAB (Common to ECE,EEE,CSE,ITandCAI)						

COURSE OBJECTIVES

1. To impart physical measurement skills and make the students understand coherence between theoretical and practical knowledge.

COURSE OUTCOMES

After successful completion of this course, the students will be able to

- CO1: Apply the principle of physics in engineering field
- CO2: Utilize the modern engineering physics techniques and tools in real time applications
- CO3: Analyse characteristics, usage and the behaviour of materials

LIST OF EXPERIMENTS

Any Ten experiments from the following list are required to be conducted

1. Rigidity modulus of material by wire-dynamic method (torsional pendulum)
2. Determination of wavelength of a source-Diffraction Grating-Normal incidence
3. Newton's rings –Radius of Curvature of Plano Convex Lens.
4. Determination of thickness of thin wire- Air wedge method
5. Determination of wavelength of Laser Source-single slit diffraction.
6. Determine the Numerical aperture of an optical fiber.
7. Melde's experiment – Transverse and Longitudinal modes.
8. Magnetic field along the axis of a current carrying coil – Stewart and Gee's apparatus.
9. Verification of laws of stretched string by using Sonometer.
10. Calculate the energy loss in a given ferromagnetic material by plotting B-H Curve.
11. Energy Band gap of a Semiconductor p - n junction
12. Characteristics of Thermistor – temperature coefficient

TEXT BOOKS

1. Engineering Physics Lab Manual by Dr.Y. Aparna and Dr.K.Venkateswarao (V.G.S.Book links).

	0	0	3	15	35	50	1.5
R20CC12L9	ELECTRONIC DEVICES AND CIRCUITS LAB						

COURSE OBJECTIVES

1. Understand the operation of PN diode and Zener diode.
2. Identify and verify the efficiency of half wave and Full wave Rectifiers.
3. Know the working of BJT.
4. Know the characteristics of transistor.
5. Know the UJT characteristics.

COURSE OUTCOMES

After the completion of this course the student will able to

- CO1: Understand and analyze the behaviour of PN junction diode, Zener diode.
 CO2: Understand the operational difference between half wave and Full wave Rectifiers.
 CO3: Identify the switching characteristics of transistor.
 CO4: Analyze the characteristics of transistor.
 CO5: Identify and analyze the UJT characteristics and its applications

LIST OF EXPERIMENTS

Any Ten experiments from the following list are required to be conducted

1. P- N Junction diode characteristics
 - Part A: Germanium Diode (Forward bias and Reverse bias)
 - Part B: Silicon Diode (Forward bias and Reverse bias)
2. Zener diode characteristics
 - Part A: V-I characteristics.
 - Part B: Zener diode as voltage regulator.
3. Rectifiers (with and without c-filter)
 - Part A: Half-wave Rectifier
 - Part B: Full-wave Rectifier
4. BJT Characteristics (CE configuration)
 - Part A: input characteristics
 - Part B: output characteristics
5. FET characteristics (CS configuration)
 - Part A: Drain characteristics
 - Part B: Transfer characteristics
6. SCR Characteristics.
7. UJT characteristics
8. CRO Operation and its Measurements
9. BJT-CE Amplifier
10. FET-CS Amplifier

I B.TECH II-SEMESTER	L	T	P	INTERNAL MARKS	EXTERNAL MARKS	TOTAL MARKS	CREDITS
	0	0	3	15	35	50	1.5
R20CC12L8	DATA STRUCTURES USING C LAB (Common to EEE and ECE)						

COURSE OBJECTIVES

1. The purpose of this course is to develop skills to design simple linear and nonlinear data structures.
2. It strengthen the ability to the students to identify and apply the suitable data structure for the given real world problem.
3. It enables them to gain knowledge in practical applications of data structures.

COURSE OUTCOMES

After the completion of this course the student should be able to

- CO1: Develop various algorithms using recursive and non-recursive functions.
 CO2: Experiment with linear data structures.
 CO3: Apply Tree traversal techniques in various applications.

EXERCISE 1

1. Write a recursive C program which computes the n^{th} Fibonacci number, for appropriate values of n.
2. Write recursive C programs for the following
 - i) Factorial of a given number
 - ii) GCD Computation
 - iii) Towers of Hanoi

EXERCISE 2

1. Write a C program that use both recursive and non-recursive functions to perform linear search.
2. Write a C program that use both recursive and non-recursive functions to perform binary search.

EXERCISE 3

1. Write a C program to implement Bubble sort.
2. Write a C program to implement Insertion sort.
3. Write a C program to implement Selection sort.

EXERCISE 4

1. Write a C program to implement Quick sort.
2. Write a C program to implement Merge sort.
3. Write a C program to implement heap sort.

EXERCISE 5

1. Write a C program to implement Stack operations using arrays.
2. Write a C program to implement Queue operation using arrays.
3. Write a C program to convert infix expression into postfix expression using stack.

EXERCISE 6

1. Write a C program to implement Stack operation using Linked list.
2. Write a C program to implement Queue operations using Linked lists.

EXERCISE 7

1. Write a C program to implement the following operations on a singly Linked using functions
 - i) Insertion
 - ii) Deletion
 - iii) Displaying
 - iv) Reversing

EXERCISE 8

1. Write a C program to implement following Operations on a Binary Tree
 - i) Create
 - ii) In-order traversal
 - iii) Pre-order traversal
 - iv) Post-order traversal
2. Write a C program to implement following Operations a Binary Search Tree
 - i) Create
 - ii) Insert
 - iii) Delete
