REPORT ON Certifications and Its Advantages

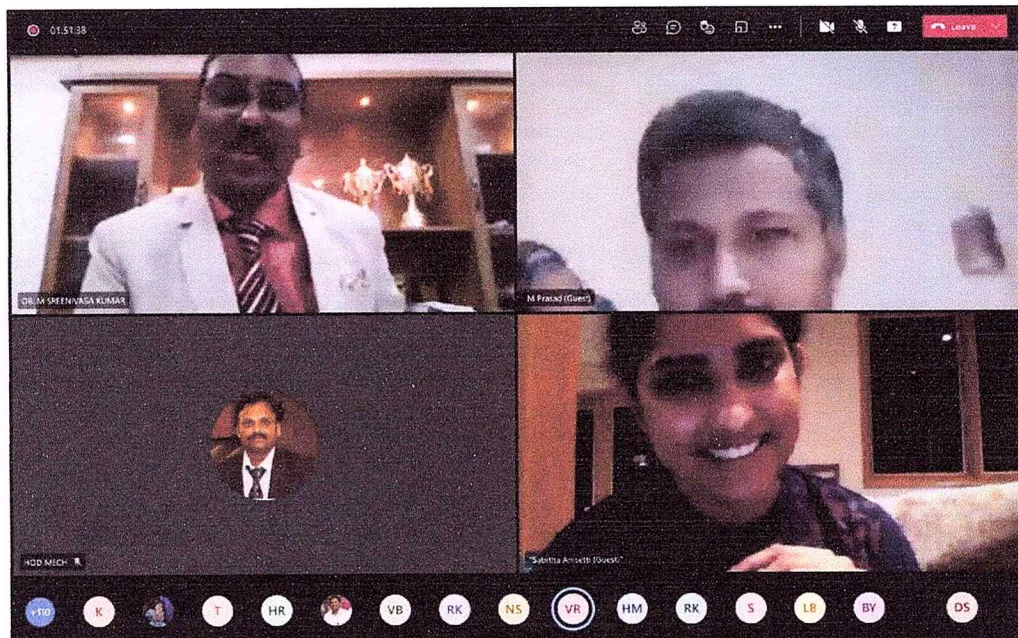

In a world where competition for jobs, pay increases, and academic success continues to increase, certifications offer hope because they are a credible, third-party assessment of one's skill and knowledge for a particular subject.

The resource people enlighten the students about various on-line & off-line certification courses:

Some of the key benefits of certification include:

- Validation of knowledge
- Increased marketability
- Increased earning power
- Enhanced academic performance
- Enhanced credibility
- Increased confidence
- Respect from peers
- Certification can improve academic performance

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

Participants: II& III Yr. B.Tech, II yr. MBA and MCA.

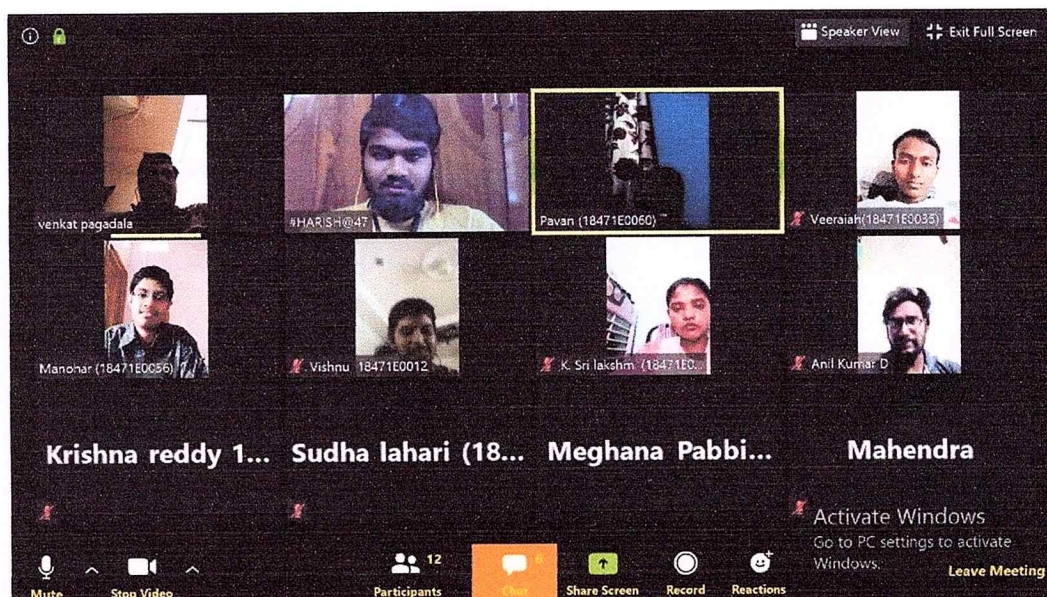

REPORT on Learning online during Pandemic and beyond

Online learning has become more and more common, whether for comfort, adapting to work hours or just having the freedom to study from anywhere. And now with the coronavirus pandemic, as people are having to stay at home, it has become more important than ever.

The resource person highlighted some positive aspects of online learning:

1. Technology has changed everything. Learning through videos, voice recognition, automatic corrections, and live exams, are a few examples of the effectiveness of online learning
2. Ease of monitoring: This is very simple, in a physical class we would have to take notes on everything the teacher tells us, but in online classes, everything is recorded either on video or in writing.
3. The human factor. When we talk about online learning we are not talking about self-study, although it is very useful. We must always bear in mind that the help of a teacher is the best way to learn
4. The ability to connect with people around the world.
5. The democratization of education. One of the advantages of online learning is that it is relatively low cost and gives people who can't afford to go to physical school access to quality education.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Career Planning and Management during Pandemic

Coronavirus has likely changed how you learn and how you've thought about your career. You're probably feeling uncertain about the future or are worried about securing that first job

A number of graduating students are looking for ways to up skill or are thinking about deferring entering the job market.

1. Do-it-yourself career planning steps Use the ACSSS career planning process to help you determine your future career plans.
2. Informational interviewing Yes, you can do informational interviews remotely! People may find themselves with a bit more time or flexibility in their schedules so don't hesitate to reach out.
3. Networking just because we are all practicing social distancing, doesn't mean you can't network! Reach out to your current network, develop new contacts, and touch base with someone you haven't been in touch with for a while.
4. Use LinkedIn If you don't have a profile, this is a great time to develop one. If you have one, now's the time to update it.
5. Education options See all the options for continuing your education at UW-Madison including our new online undergraduate degree completion program, professional degrees and certificates, and taking courses as a University Special student.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session

REPORT ON Personality Development

Dr.M.Sreenivasa Kumar; Principal, NEC enlighten the students on personality development as Human personality influences and impacts the functioning of an individual and organizations. The fact that humans are social and is determined by individual as well as collective contexts. Understanding one's own personality and nurturing it well enables one to be a fine human being and an effective business. Humans need to learn how to cope with the problems and face the hardships while shaping our careers to become business and contributing citizens. University education is to enable young adults to understand the world in the liberal sense and to take forward it for the better.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Career Planning and Management

Though college is a great opportunity to learn life skills, it's also a time when students are surrounded by several resources and individuals ready to help them in advance. As a college student, taking career advice in particular can help them feel more equipped upon graduation.

Mr. Rajesh gave several guidelines regarding career planning to the students as: It can also help you become more confident in your skills and ensure you've chosen the right field as well as guide you toward making helpful career decisions.

1. Seek internship opportunities.
2. Consider taking part in a work-study program.
3. Grow your skills and knowledge.
4. Get an early start.
5. Keep your skills up-to-date.
6. Stay focused.
7. Find a balance with your personal life.
8. Pursue your passion.
9. Strive for excellence and stay motivated.
10. Use your school's career services.
11. Build your network.
12. Actively seek opportunities.
13. Create opportunities.
14. Find companies on social media.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Professional Etiquette & Communication

The resource person educated students regarding professional etiquette:

Etiquette – what exactly is it? Etiquette is a set of unwritten rules that guide people in certain social situations. These guidelines for “good etiquette” can differ depending on cultural expectations, as well as where the exchange takes place, and with whom. You may be following “good etiquette” and not even realize it. Common rules include:

1. Saying please and thank you.
2. Read, think, and then respond.
3. Mind mechanical and grammatical errors.
4. Mind word usage and tone.
5. Avoid sarcasm
6. Respect other's privacy
7. Effective oral communication
8. Barriers to communication
9. Be authentic and genuine.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Personality Development

The personality development programme of 'Igniting Minds' on 4th September 2018 has been organized by NEC. Igniting minds means to explode our thoughts.

The session was led by Dr.M.Sreenivas Kumar Principal, NEC

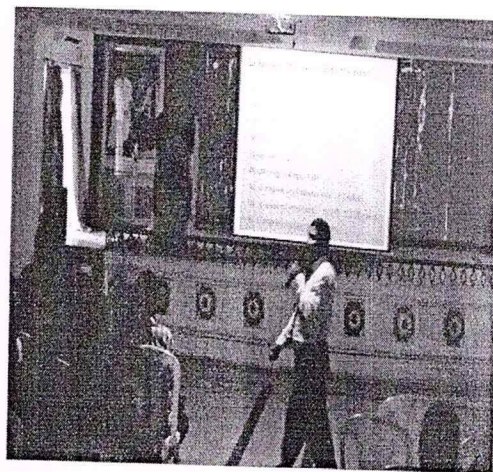

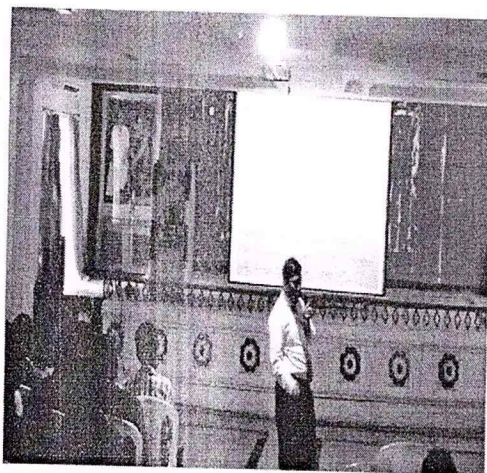

The main contents of the training program were displayed on Presentation.

The session was focused on below mentioned topics.

- 1) Goal Setting
- 2) Time Management
- 3) Correcting the way
- 4) Listening Skills
- 5) Team Work

The session started with 'Goal Setting Process'. There are several steps of Goal setting which were very useful for setting the goals. Then exercise was given to students to write about their personal, Social, Professional, Financial, and Health Goals.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Career Planning and Management

The career development plans provide for the assessment of core competencies (outcomes) Required to function effectively.

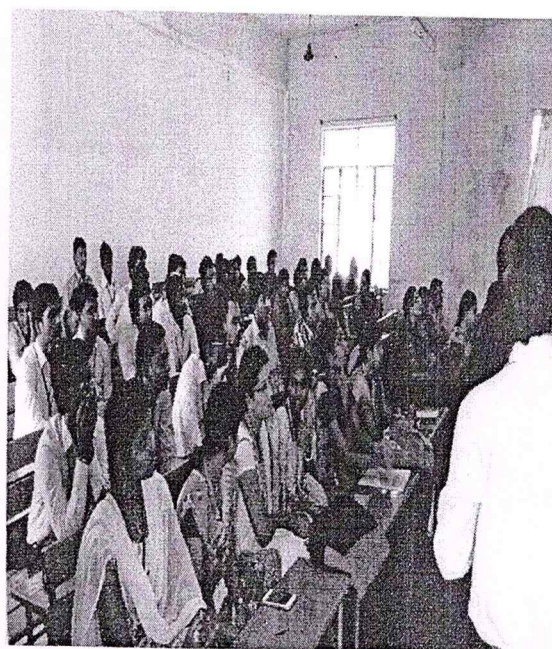

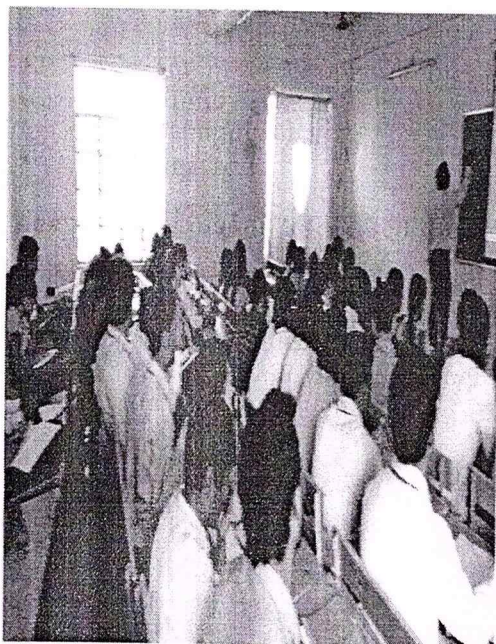

Career planning is the process through which individuals identify their personal skills, knowledge and abilities and execute steps to attain their career goals. There are five basic steps in the career planning process:

- (1) Self-assessment,
- (2) Investigating career opportunities,
- (3) Goal setting,
- (4) Action planning, and
- (5) Evaluation.

The resource person addressed the students:

Career management is an ongoing process of preparing, developing, implementing and monitoring career plans and strategies undertaken by the individual alone or in concert with the organisation's career system. Career management involves an organization's efforts to Manage the flow of individuals through positions over time in ways that will best meet both organizational and individual goals.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON Awareness on Higher Education in India & Abroad

The Indian higher education system is one of the largest such systems in the World. It is estimated that there will be a tremendous pressure of numbers on this system and a large number of additional students will be knocking at the doors of higher education institutions in the country. There are also new challenges of management and regulation being faced by these institutions, which require serious attention, both at the institutions in the public sector and also those in the private sector now growing at a fast pace.

The resource person addressed the students:

1. Creativity and critical thinking to encourage logical decision-making and innovation;
2. Ethics and human & Constitutional values like empathy, respect for others, cleanliness, courtesy, democratic spirit, spirit of service, respect for public property, scientific temper, liberty, responsibility, pluralism, equality, and justice;
3. Promoting multilingualism and the power of language in teaching and learning;
4. Life skills such as communication, cooperation, teamwork, and resilience;
5. Focus on regular formative assessment for learning rather than the summative assessment that encourages today's 'coaching culture';
6. Extensive use of technology in teaching and learning, removing language barriers

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON EMERGING TECHNOLOGIES AND RELATED JOB OPPORTUNITIES

Greater use of technologies such as robotics process automation, machine learning, artificial intelligence (AI), cloud computing, and internet of things (IOT) has led to significant changes in the way work is done in organisations.

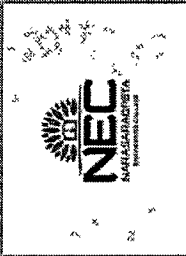

Despite the lockdown and recessionary trends, specific domains and technologies across the IT space continue to develop at a steady space. These technologies cover the spectrum of the following IT functions and areas:

- Data Analytics
- Cloud Computing
- Cyber security
- Artificial Intelligence
- Deep Learning
- Machine Learning
- IOT
- Block chain.

The trainer conducted Group Discussion and various sessions for students to enhance the job cracking skills.

REPORT ON Personality Development Aspects

Personality development comes from physical and mental state of mind. It's also an initiative to improve certain traits which contribute to overall personality. Good personality can help in better social and professional life.

There are a lot of factors that have gone into the development of a particular type of personality. From childhood to adulthood several aspects of personality development, some of which include the mental aspects, spiritual aspects, emotional aspects, physical aspects, social aspect, moral aspect. These various aspects provide a different view into the process by which an individual's personality is developed.

- Enhances Communication Skills
- Develops Optimism
- Improving Personality Skills
- Personality Is a Mirror Reflection of an Individual
- Extraversion
- Agreeableness
- Openness
- Conscientiousness
- Neuroticism

At the end of the session all the students gave feedback about session. Few students shared their experience on the session

REPORT ON How to crack GRE, GATE & TOEFL Exams

One needs to prepare for any competitive exam with complete dedication and diligence. Explore the options and practise with the focus to reach the desired goals.

After graduation, every student wants a good package in a reputed company. By the end of the undergraduate program, the student often has two roads - job or higher studies. However, there is a third back-up option too, which is dropping a year for the preparation of competitive exams or enhancing skills as per the market scenario. To qualify for GATE, a minimum of one year for the preparation is required. To qualify for GRE, a minimum of one year for the preparation is required.

To qualify for GATE, a minimum of one year for the preparation is required.

- Start your preparation at least six months before the exam
- Don't let the extent of syllabus and prep material throw you off your game
- Have a clear test date in mind and start prepping towards it
- Strategize your study plan
- Preparation tips for Verbal Reasoning
- Preparation tips for AWA
- Preparation tips for Quantitative Reasoning
- Select study materials wisely and use app based learning

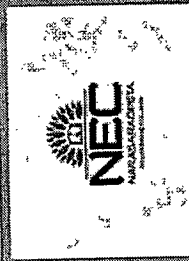

Graduate Record Examination or GRE is basically divided into three sections: Analytical writing, Verbal Reasoning and Quantitative Reasoning.

For Verbal Reasoning and Quantitative Reasoning, raw scores are determined by the number of questions a student answers correctly.

REPORT ON COLLEGE TO CORPORATE

The session was led by Mr. Ananda Oliveti, Lead-Trainer, NEC...

- It can be from the final years of college/campus to the early years of one's career.
- Transition from campus to career needs more attention as it involves a lot of planning.
- The objective of the planning must ensure that the person possesses the necessary skills to enable the person to cope up with the corporate culture and climate.
- For an individual, starting to work in an organization is a unique and critically important phase that requires a special perspective and strategy to be successful as a fresher.
- The Trainer suggests the students that the success of the transition period will have a major impact on aspects like salary, advancement, job satisfaction, and ability to have cordial relationships within the organization as well as on one's own feelings of success, accountability and commitment to the job.
- Campus life and corporate life are fundamentally different. If one continues to have same expectations from his employer as he/she had from the professors in the campus, one will be highly disappointed and damage the career success.
- As the culture of education is so different from the organizational culture. So, the Trainer guided the students to bridge the gap.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON PERSONALITY DEVELOPMENT

The trainer addressed the students on various aspects of personality development skills, answered the questions and motivated students.

Why do students need personality development?

Personality Development reflects the inner self of the individual. It can range from the career-effective skills a child hones to nature, action, and reaction of the individual to strenuous situations. It is a set of traits that shape the inner and outer personality of a person.

What role does personality development play in one's career?

Personal growth can have an impact on one's career. The practice of remaining calm in difficult situations and the ability to work under pressure can play an excellent role in enhancing personality. In addition to that, factors such as technical skills, extra-curricular skills open up more opportunities for the individual. Enhanced communication, effective managerial skills, leadership qualities, and public-speaking skills equip a person for the future.

- Innovation and team building
- Growth in every perspective
- Strong management
- Resolves conflict

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.

REPORT ON BUSINESS ETIQUETTE & EMAIL WRITING

- Business etiquette is a set of manners that is accepted or required in a profession.
- Those who violate business etiquette are considered offensive.
- The penalty for such behaviour frequently lies in the disapproval of other organization members.
- Business etiquette is important because it creates a professional, mutually respectful atmosphere and improves communication, which helps an office serve as a productive place.

The Trainer enlighten the students regarding the work culture:

- How do you treat clients or customers?
- How do you treat your co-workers and supervisor?
- How do you conduct yourself in your cubicle or office?
- How do you conduct yourself during meetings?
- What kind of email messages do you send?
- How do you conduct yourself in the break room?
- How do you conduct yourself during business-sponsored social events?
- How do you conduct yourself on the telephone?

Email etiquette is how we maintain a respectful, appropriate and professional tone in the context of an email. This includes but is not limited to using correct spelling and grammar, addressing the reader with correct titles, and identifying oneself and one's needs clearly.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session

REPORT ON OPPORTUNITIES FOR HIGHER EDUCATION IN INDIA & ABROAD

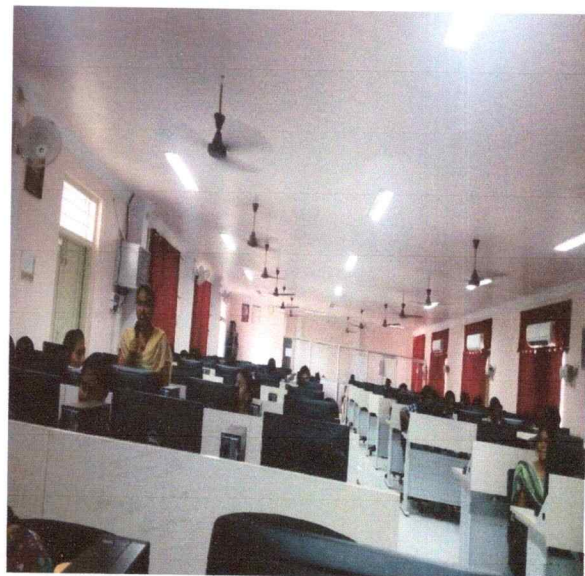

The Trainer opined that why Indian students usually opt to study abroad,

- Because the education system in abroad is more advanced than India's and there is a wide unavailability of courses in India that are available abroad.
- With the increasing surge in popularity among students in India, Education abroad is becoming a means for students to achieve their full potential while developing their personality to improve their chances of having a fulfilling and promising careers.
- Quality Education.
- Employment Prospects.
- Immigration.

Challenges in Higher Education in India

- Enrolment.
- Equity.
- Quality.
- Infrastructure.
- Research and Innovation.

At the end of the session all the students gave feedback about session. Few students shared their experience on the session.
