## ABOUT THE DEPARTMENT

### What We Do

Our Civil Engineering department seeks to understand natural phenomena and their applications in the field, and utilize that knowledge to innovate and build sustainable engineering structures for Society. We educate our students in both natural and manmade systems, which enable them to get a true sense of the science of civil engineering.

Our faculty and staff are dedicated to teaching our students such that they are best equipped to serve the region and the nation as professionals, scholars, academic leaders, researchers, and entrepreneurs, and tackle complex engineering problems in the field.

### What We Offer

Established in the year 2009, our Department of Civil Engineering offers undergraduate programme (B.Tech) with a flexible curriculum that adapts to the ever-increasing discoveries in the field.

Our civil engineering department employs an experienced faculty and cutting-edge learning avenues in the fields of Surveying, Fluid Mechanics, Strength of Materials, Engineering Geology and Environmental Engineering, Geotechnical Engineering, Highway Engineering, and Concrete Technology.

Our department also offers specialization in structural, geotechnical, hydraulics and water resources, environmental, construction, transportation, and more.

Our students attend workshops, conferences, seminars, and paper-presentation forums that focus on interdisciplinary topics, and receive exposure to guest lecturers of premium institutions.

We offer an education that will transform our students into leaders in the field of civil engineering.

A programmable Logic Controller (PLC) is a digital computer used for automation of typically industrial electromechanically processes, such as control of machinery, factory assembly lines, light fixtures are used in many machines in my industries.

### **Topic Covered:**

- Hardware details of SIMATIC controllers, Programming language, NO/NC Concept.
- Positive and Negative Trigger, Set/Reset Instructions.
- SR&RS Flip-Flop, Latching concept. On-Delay timer, Retentive on delay timer, OFF-

Delay timer, pulse timer. Data block, Industrial Based comparators, up Counter, Down Counter, Up/Down Counter and Industrial Based Applications on Counters.

- Subroutine Programming Blocks FC, FB. Analog value processing and different industrial based applications on Analog. Brief Introduction of SCADA, HMI and DCS System.

### Outcome of the programme:

- A PROGRAMMABLE LOGIC CONTROLLER (PLC) is an industrial computer control system that continuously monitors the state of input devices and makes decisions based upon a custom program to control the state of output devices.
- These controllers can automate a specific process, machine function, or even an entire production line
- Flexible in Nature: One model of PLC can be used for different operations as per requirement.
- Easy to install and troubleshooting: In hard wired relay based systems, installation time is more as compared to the PLC based control panels.

### About Python Programming:

**Python** is an interpreted high-level general-purpose programming language. Its design philosophy emphasizes code readability with its use of significant indentation. Its language constructs as well as its object-oriented approach aim to help programmers write clear, logical code for small and large-scale projects.

Python is dynamically-typed and garbage-collected. It supports multiple programming paradigms, including structured (particularly, procedural), object-oriented and functional programming. It is often described as a "batteries included" language due to its comprehensive standard library.
