AVAILABILITY OF SOFTWARES FOR PLAGIARISM CHECK

The Institution implemented a policy of anti-plagiarism during 2015-2016 to the academic publications such as research articles, project reports, seminar reports and Thesis produced by the faculty and students of UG, PG. At present institution prescribed zero percent plagiarism to the research articles such as Journals, Conference papers and also Project thesis prescribed the strict adherence of plagiarism limit.

Institution enrolled subscription of Anti plagiarism soft wares DUPLICHECKER and PAPERRATER, which are free software's and any one can access the portal and can check the content at free of cost.

DUPLICHECKER:

Duplichecker is one of the most well-known and pretty popular free online plagiarism checker and plagiarism removal websites that goes through billions of websites on the internet and provides you with any necessary improvements within a few seconds. Unlike other online Duplicate Content checkers on the internet, Dupli checker is entirely free for checking content errors, duplicheck, phrase check, and more, although it does have some premium features that are as good as the free subscription edition. Deep Search, Flexible Plans, Free-To-Use Tool, Accurate Reports are Features and Benefits of Duplichecker.

PAPERRATER:

PaperRater is an online proofreading software designed to help businesses leverage artificial intelligence (AI) technology to identify grammatical mistakes, detect plagiarism, and automatically score essays. Teachers can upload files in multiple formats including DOC, ODT, TXT, RTF, and DOCX to the platform and use the vocabulary builder to learn new words and their meanings in different contexts.

PaperRater uses machine learning (ML) and natural language processing (NLP) capabilities, which let writers gain insights into the syntax or structure of their text, receive feedback about errors, and enhance readability across papers, memos, letters, and more. The plagiarism checker compares the submitted files to multiple documents, books, journals, research papers, articles, and other sources across the web, ensuring originality of the content. The software also allows educators to receive students' assignments via email and view a summary of all submissions in a tabular form.

PaperRater analyses submitted documents based on various modules such as sentence beginnings, readability, vocabulary usage, sentence length or variability, passive voice, and more. Students can also view statistics about plagiarism, grammar, or spelling mistakes and download results in PDF format according to requirements.
