Today, our college NSS Unit conducted a **Free Dental Check-Up Program** in our college premises. For this program, we invited **Dr.A.N.Tejaswini, Dentist from Siri Dental Clinic, Narasaraopet**. While addressing she told the students that nearly 60% of the people are suffering from bad mouthing (Halitosis) disease. Tooth Decay and gums problem are main reasons to this effect. To prevent these problems every one should avoid high sugar content items, brushing twice in a day, drinking more water and visit your dentist regularly. Our Hon'ble Principal Dr.M.Sreenivasa Kumar thanked the Siri Dental Clinic for their acceptance and conducted this program. Finally, after diagnosis free medicines were distributed to the students. Our Management also thanked the doctors for their free service to nearly 150 of our students and made this program a grand success.

REPORT ON
WORLD BLOOD DONOR DAY- 2022

A blood donation occurs when a person voluntarily has blood drawn and used for transfusions and/or made into biopharmaceutical medications by a process called fractionation (separation of whole blood components). Donation may be of whole blood, or of specific components directly (apheresis). Blood banks often participate in the collection process as well as the procedures that follow it. Today in the developed world, most blood donors are unpaid volunteers who donate blood for a community supply. In some countries, established supplies are limited and donors usually give blood when family or friends need a transfusion (directed donation). Many donors donate for several reasons, such as a form of charity, general awareness regarding the demand for blood, increased confidence in oneself, helping a personal friend or relative, and social pressure. Despite the many reasons that people donate, not enough potential donors actively donate. However, this is reversed during disasters when blood donations increase, often creating an excess supply that will have to be later discarded. In countries that allow paid donation some people are paid, and in some cases there are incentives other than money such as paid time off from work. People can also have blood drawn for their own future use (autologous donation). Donating is relatively safe, but some donors have bruising where the needle is inserted or may feel faint.

The amount of blood drawn and the methods vary. The collection can be done manually or with automated equipment that takes only specific components of the blood. Most of the components of blood used for transfusions have a short shelf life, and maintaining a constant supply is a persistent problem. This has led to some increased interest in auto transfusion, whereby a patient's blood is salvaged during surgery for continuous reinfusion—or alternatively, is "self-donated" prior to when it will be needed. (Generally, the notion of "donation" does not refer to giving to one's self, though in this context it has become somewhat acceptably idiomatic.)

Goal & Objectives of Voluntary Blood Donation:

- Provide safe and quality blood and blood components collected from voluntary donors, round the clock, at affordable cost to the general public and free of cost to the poor
- Ensure safety and quality of blood.
- Motivate and maintain a permanent well-indexed record of voluntary blood donors.
- Educating the community on the beneficial aspects of blood donation and harmful effect of collecting blood from paid donors.

HEALTH BENEFITS OF BLOOD DONATION

It is important to know that human blood cannot be manufactured, people are the only source of it and that is why it is important to donate blood and help those who need it.

1 PREVENTS HEMOCHROMATOSIS

Hemochromatosis is a health condition that arises due to excess absorption of iron by the body. This may be inherited or may be caused due to alcoholism, anemia or other disorders. Regular blood donation may help in reducing iron overload.

2 ANTI-CANCER BENEFITS

Blood donation helps in lowering the risk of cancer. By donating blood the iron stores in the body are maintained at healthy levels. A reduction in the iron level in the body is linked with low cancer risk.

Potential donors are evaluated for anything that might make their blood unsafe to use. The screening includes testing for diseases that can be transmitted by a blood transfusion, including HIV and viral hepatitis. The donor must also answer questions about medical history and take a short physical examination to make sure the donation is not hazardous to his or her health. How often a donor can donate varies from days to months based on what component they donate and the laws of the country where the donation takes place. For example, in the United States, donors must wait 56 days (eight weeks) between whole-blood donations but only seven days between platelet apheresis donations and twice per seven-day period in plasmapheresis.

REPORT ON
KARGIL VIJAY DIWAS-2022

Kargil Vijay Diwas is commemorated every 26 July in India, to observe India's victory over Pakistan in the Kargil War, ousted the Pakistani Forces from their occupied positions on the mountain tops of Northern Kargil District in Ladakh in 1999. Initially, the Pakistani army denied their involvement in the war, claiming that it was caused by Kashmiri militants forces. However, documents left behind by casualties, testimony of POWs and later statements by the Prime Minister of Pakistan Nawaz Sharif and Pakistan Army Chief of Army Staff Pervez Musharraf showed the involvement of Pakistani paramilitary forces, led by General Ashraf Rashid. Kargil Vijay Diwas is celebrated on 26 July every year in honor of the Kargil War's Heroes. This day is celebrated all over India and in national capital, New Delhi, where the Prime Minister of India pays homage to the soldiers at Amar Jawan Jyoti at the India Gate every year. Functions are also organized all over the country to commemorate the contributions of the Indian Armed Forces.

After the Indo-Pakistani War of 1971, there had been a long period of relatively few direct armed conflicts involving the military forces of the two neighbors - notwithstanding the efforts of both nations to control the Siachen Glacier by establishing military outposts on the surrounding mountains ridges and the resulting military skirmishes in the 1980s.

Kargil Vijay Diwas in Narasaraopeta Engineering College celebrated with a cultural performance by cadets of singing team. Later chief guests gave ranks to the cadets who qualified as rank holders and appreciated the cadets by distributing B certificates to who passed B certificate exam.

INTERNATIONAL YOUTH DAY - 2022

INTERNATIONAL YOUTH DAY

International Youth Day on August 12 – 18th focuses on the difficulties that some young people are experiencing throughout the world. Half the children between the age of six and 13 lack basic reading and math skills and childhood poverty is still a prevalent problem globally.

It's an initiative that honours the traits of young people and that acknowledges the challenges that today's fledging youth face. To support the elimination of these issues it is important that the youth is able to reach the right resources for education, wellbeing, medicine and more. Scholar is a platform that has centralized scholarships from around the world to help the youth of the world. International Youth Day began in 2000 and was organized by the UN to recognize the input that young people make in education, community development, environmental groups, volunteering for different social projects.

INTERNATIONAL YOUTH DAY @ NEC

A seminar program on the topic of **An Engineering Graduate vs. An Employable Engineer** was such a great day to give a message to the young engineers of our NEC College. **NCC Guntur Group Commander Colonel SM Chandrasekhar** attended the conference as the chief guest and addressed the young engineers. He explained to the students that the youth should study engineering and aim for a job, not just for a certificate. NEC College Principal

REPORT ON
INDIAN BLACK DAY - 2023

The 2019 Pulwama attack occurred on 14 February 2019, when a convoy of vehicles carrying Indian security personnel on the Jammu–Srinagar National Highway was attacked by a vehicle-borne suicide bomber at Lethapora in the Pulwama district of the erstwhile state of Jammu and Kashmir. The attack killed 40 Indian Central Reserve Police Force (CRPF) personnel as well as the perpetrator—Adil Ahmad Dar—who was a local Kashmiri youth from the Pulwama district. The responsibility for the attack was claimed by the Pakistan-based Islamist terrorist group, Jaish-e-Mohammed. India blamed neighboring Pakistan for the attack, while the latter condemned the attack and denied having any connections to it. The attack dealt a severe blow to India–Pakistan relations, consequently resulting in the 2019 India–Pakistan military standoff. Subsequently, Indian investigations identified 19 accused. By August 2021, the main accused along with six others had been killed, and seven had been arrested.

On 14 February 2019, a convoy of 78 vehicles transporting more than 2,500 Central Reserve Police Force (CRPF)[a] personnel from Jammu to Srinagar was travelling on National Highway 44. The convoy had left Jammu around 03:30 IST and was carrying a large number of personnel due to the highway having been shut down for two days prior. The convoy was scheduled to reach its destination before sunset. At Lethapora near Awantipora, around 15:15 IST, a bus carrying security personnel was rammed by a car carrying explosives. It caused a blast which killed 40 CRPF personnel of the 76th Battalion and injured many others. The injured were moved to the army base hospital in Srinagar.

Pakistan-based militant group Jaish-e-Mohammed claimed responsibility for the attack. They also released a video of the assailant Adil Ahmad Dar, a 22-year-old from Kakapora who had joined the group a year earlier. Dar's family had last seen him in March 2018, when he left his house on a bicycle one day
