REPORT ON JUBILATION-2K24

Every academic year the department of Mechanical Engineering of Narasaraopeta Engineering College organizes National level Student Tech-Fest (JUBILATION) for the aspirants assembling from various engineering college. The objective of this fest is to provide platform for the students to showcase their talent with a competitive spirit. The event was successful enough to attract as many as 85 registrations across the state. Students are actively participated in all the events and presented their work. Focusing on the types of events to include in the fest was decided by fest coordinators keeping the interest and need of the engineering student into consideration. The events like Mech Slides, QUIZ Thunder & Yantralayam are equally planned, executed and have managed to gather maximum response. As far as Mech Slides event is concerned the registrations were done in advance as the paper scrutiny needed to be done and to give opportunity to present best innovative ideas submitted during the fest days. The winners were encouraged with a cash prizes for all the events. Department feels proud to organize such a successful event and would like to convey thanks to the Principal and the management for their timely advices and for all the necessary arrangements.

On the occasion of **Jubilation-2K24** on **01 & 02-03-2024**, about 15 teams from various colleges have actively participated. Out of total 15 teams, 3 teams are from RVR&JC Engineering College, Guntur, 1 team from Gudlavalleru Engineering College, Gudlavalleru, 7 teams from UCEN- JNTUK College of Engineering Narasaraopeta, 2 Teams from Vignan University ,Vadlamudi. , 2 Teams from Eswar College Of Engineering ,Kesanupali. , 70 Teams from NEC have actively participated.

Dr. D Sameer Kumar, Associate Professor, Department of Mechanical Engineering, Bapatla Engineering College, Bapatla, has acted as judge .Total eight prizes were announced for all the events after thorough evaluation.

Objective of the Program :

Amazon Simple Storage Service (Amazon S3) is an object storage service that offers industry-leading scalability, data availability, security, and performance. Customers of all sizes and industries can use Amazon S3 to store and protect any amount of data for a range of use cases, such as data lakes, websites, mobile applications, backup and restore, archive, enterprise applications, IoT devices, and big data analytics. Amazon S3 provides management features so that you can optimize, organize, and configure access to your data to meet your specific business, organizational, and compliance requirements.

Amazon S3 Express One Zone is a high-performance, single-zone Amazon S3 storage class that is purpose-built to deliver consistent, single-digit millisecond data access for your most latency-sensitive applications. S3 Express One Zone is the lowest latency cloud object storage class available today, with data access speeds up to 10x faster and with request costs 50 percent lower than S3 Standard. S3 Express One Zone is the first S3 storage class where you can select a single Availability Zone with the option to co-locate your object storage with your computer resources, which provides the highest possible access speed. Additionally, to further increase access speed and support hundreds of thousands of requests per second, data is stored in a new bucket type: an Amazon S3 directory bucket.

Outcome of the program

After completion of this program, the students are able to

1. Analyze Amazon Linux EC2 Instance.
2. Analyze Manage Elastic Block Storage.
3. Analyze Amazon Virtual Private Cloud.

Objective of the Program :

Amazon Simple Storage Service (Amazon S3) is an object storage service that offers industry-leading scalability, data availability, security, and performance. Customers of all sizes and industries can use Amazon S3 to store and protect any amount of data for a range of use cases, such as data lakes, websites, mobile applications, backup and restore, archive, enterprise applications, IoT devices, and big data analytics. Amazon S3 provides management features so that you can optimize, organize, and configure access to your data to meet your specific business, organizational, and compliance requirements.

Amazon S3 Express One Zone is a high-performance, single-zone Amazon S3 storage class that is purpose-built to deliver consistent, single-digit millisecond data access for your most latency-sensitive applications. S3 Express One Zone is the lowest latency cloud object storage class available today, with data access speeds up to 10x faster and with request costs 50 percent lower than S3 Standard. S3 Express One Zone is the first S3 storage class where you can select a single Availability Zone with the option to co-locate your object storage with your computer resources, which provides the highest possible access speed. Additionally, to further increase access speed and support hundreds of thousands of requests per second, data is stored in a new bucket type: an Amazon S3 directory bucket.

Outcome of the program

After completion of this program, the students are able to

1. Analyze AWS global infrastructure.
2. Analyze AWS account and management console.
3. Analyze Create Windows server & Linux Server in AWS.
4. Analyze Extend HDD size in windows Instances.
