ABOUT THE DEPARTMENT

The Department of EEE started in the year 1998. EEE department offers an AICTE-approved four-year undergraduate programme (B.Tech) in Electrical & Electronics Engineering. The JNTU-Kakinada-affiliated department is twice accredited by the NBA, in 2009 & 2013, and is certified by the ISO. EEE course offers expertise in electrical machines, power electronics, generation, transmission and distribution of power, power system operation and its control using computer methods such as artificial neural networks, Fuzzy Logic, micro-controllers and more. The department conducts research programs, seminars, and workshops to widen the knowledge base of students and faculty members. By the end of the four years, our students are equipped to become professionals, scholars, academicians, researchers, and entrepreneurs right from the inception of the college, boasts of well experienced and technically excellent faculty members. The department imparts knowledge and skills to inculcate the professional responsibilities, leadership qualities to succeed in diverse career, capability to utilize engineering skills in industry. The department faculty encourages the students to implement innovative ideas in their project works, to develop industry readiness and R&D.

OBJECTIVE OF COURSE

This training programme is specially designed for Engineering College Teachers and it mainly deals with various aspects of MATLAB. The course aims to achieve the following objectives: Use of MATLAB and Math Works Statistics and Machine Learning Toolbox. Create publishable, reproducible analysis reports.. Have the basic understanding on how to explore Statistics and Machine Learning Toolbox Create publishable, reproducible analysis reports.. Have the basic understanding on how to explore Statistics and Machine Learning Toolbox advanced methods While the goal is not to focus on 'programming', participants should become capable to gain a working proficiency in the use of MATLAB in

Power conversion requires control of IGBTs, power MOSFETs, and other solid-state power electronics. Designing a digital controller with simulation can help ensure stability, improve power quality, optimize dynamic performance, and handle fault conditions. Power electronics simulation provides insight into interaction of digital control algorithms, power semiconductors, and the balance of the electrical system early during development, before hardware testing begins. For battery management systems and power electronics–based systems such as motor drives, power converters, and inverters, fast closed-loop simulation enables power electronics engineers to evaluate and verify their design choices before a controller is implemented.

ABOUT THE DEPARTMENT

The Department of EEE started in the year 1998, EEE department offers an AICTE-approved four-year undergraduate programme (B.Tech) in Electrical & Electronics Engineering. The JNTU-Kakinada-affiliated department is twice accredited by the NBA, in 2009 & 2013, and is certified by the ISO. EEE course offers expertise in electrical machines, power electronics, generation, transmission and distribution of power, power system operation and its control using computer methods such as artificial neural networks, Fuzzy Logic, micro-controllers and more. The department conducts research programs, seminars, and workshops to widen the knowledge base of students and faculty members. By the end of the four years, our students are equipped to become professionals, scholars, academicians, researchers, and entrepreneurs right from the inception of the college, boasts of well experienced and technically excellent faculty members. The department imparts knowledge and skills to inculcate the professional responsibilities, leadership qualities to succeed in diverse career, capability to utilize engineering skills in industry. The department faculty encourages the students to implement innovative ideas in their project works, to develop industry readiness and R&D.

OBJECTIVE OF COURSE

The main objective of this course is to give a comprehensive understanding and hands-on exposure to the various processes, industrial tools, protocols, and design specifics which are involved in PCB Designing so that the students can design an electronic printed circuit board for a specific application using industry-standard software after going through the complete procedural steps of developing circuit schematic, board files, image transferring, assembly, soldering, and testing.

IQAC

The Learning Outcomes of the course are as follows:

- **Familiarization of the various types of devices/components that may be mounted on PCB**
- **Understanding of the PCB layout techniques for optimized component density and power saving.**
- **Pre-requisite knowledge to perform design and printing of PCB with the help of various image transfer and soldering techniques**
- **Understanding of the current trends and scope of the PCB industry**

IQAC

Objective of Workshop

An Innovative Coding Skills in Python Workshop is an introduction to fundamental programming concepts by way of the Python programming language. Python is a high-level interpreted language that has many benefits, including easy-to-read and easy-to-write syntax and powerful libraries that provide additional functionality. Even though Python is a great programming language for beginners, it is also used extensively for practical applications in engineering and data science. This course is intended for people with no or very little prior programming experience. It covers a range of topics, such as data types, control flow, functions, file operations, and object-oriented programming. When you finish this course, you will be able to create Python programs for a variety of applications.

Target Audience:

- Faculty memebers from AICTE institutions.

Guidelines:

- A test shall be conducted by organizing committee at the end of the program.
- E-certificate shall be issued to those participants who have attended the program

This is to certify that ICT Academy has successfully implemented the **Finishing School of Employability** program in the "**Certificate Course on Cloud Solution Architect**" as part of the CSR initiative of Infosys Foundation. The program provided comprehensive Cloud training for 100 hours, conducted from **07/12/2024 to 24/12/2024**.

A total of 65 students were trained during this period. The course materials were provided to all the students participating in the training, ensuring that they had access to relevant resources throughout the program. The trainers, assigned full-time by ICT Academy, delivered the training effectively, providing content that was both informative and practical.

The program also included Mock Assessments and Assessment Preparatory Sessions, which significantly contributed to the students' understanding and readiness. We highly appreciate ICT Academy efforts in preparing students for their future careers through this well-structured training. The course was an excellent experience, and we believe it will greatly benefit the students in their career progression.

We look forward to more such valuable training programs from ICT Academy in the future.

Thank you.

As part of Amazon, we strive to be Earth's most customer-centric company. We work backwards from our customers' problems to provide them with cloud infrastructure that meets their needs, so they can reinvent continuously and push through barriers of what people thought was possible.

Whether they are entrepreneurs launching new businesses, established companies reinventing themselves, non-profits working to advance their missions, or governments and cities seeking to serve their citizens more effectively—our customers trust AWS with their livelihoods, their goals, their ideas, and their data.
