ACTION TAKEN REPORT ON FEED BACK OF FACULTY'S ON CURRICULUM SUMMARY

Academic Year: 2024-25

The feedback on the curriculum is collected and analysed during college academic meetings. More than 90% of teachers gave positive feedback regarding the content and design of the curriculum, indicating overall satisfaction. Feedback above this level was considered positive, while responses below it were treated as areas for improvement.

The feedback analysis was discussed with the principal. As the institution is autonomous and affiliated to Jawaharlal Nehru Technological University, Kakinada, there is provision for minor amendments to the syllabus. The curriculum-related suggestions were shared with faculty members and placed before the Board of Studies and relevant committees for review, approval, and inclusion in the next academic regulations.

Based on the feedback received from faculty and other stakeholders, the following actions were taken to improve the curriculum and its implementation:

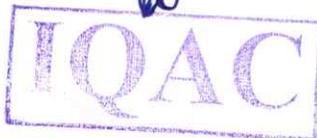

- Our college is going to introduce an AI-based online platform FLUENT EDGE for B.Tech students of all four years to improve their communication skills. This platform will be useful for both students and faculty, as it helps in continuous learning, assessment, and skill development
- National and international conferences are planned with support from external funding agencies.
- Faculty members are encouraged to participate in international conferences.
- Faculty are motivated to publish research papers, pursue Ph.D. programmes, and undertake post-doctoral research.
- Faculty members are encouraged to enrol in online and certification courses for continuous professional development.

To further strengthen the academic process:

- Subject Expert Committee meetings are conducted regularly.
- The Board of Studies functions effectively to review and update the curriculum.
- Faculty members actively participate in curriculum design and development.

All curriculum-related proposals and recommendations are communicated by IQAC to the Principal for approval and implementation.
