### Objective of the Program :

Amazon Web Services has been providing world-leading cloud technologies that help any organization and any individual build solutions to transform industries. As part of Amazon, we strive to be Earth's most customer-centric company. We work backwards from our customers' problems to provide them with cloud infrastructure that meets their needs, so they can reinvent continuously and push through barriers of what people thought was possible.

Whether they are entrepreneurs launching new businesses, established companies reinventing themselves, non-profits working to advance their missions, or governments and cities seeking to serve their citizens more effectively—our customers trust AWS with their livelihoods, their goals, their ideas, and their data.

**Objective of the Program :**

**Amazon Web Services** has been providing world-leading cloud technologies that help any organization and any individual build solutions to transform industries. As part of **Amazon**, we strive to be Earth's most customer-centric company. We work backwards from our customers' problems to provide them with cloud infrastructure that meets their needs, so they can reinvent continuously and push through barriers of what people thought was possible.

Whether they are entrepreneurs launching new businesses, established companies reinventing themselves, non-profits working to advance their missions, or governments and cities seeking to serve their citizens more effectively—our customers trust AWS with their livelihoods, their goals, their ideas, and their data.

### Objective of the Program :

An Innovative Coding Skills in Python Workshop is an introduction to fundamental programming concepts by way of the Python programming language. Python is a high-level interpreted language that has many benefits, including easy-to-read and easy-to-write syntax and powerful libraries that provide additional functionality. Even though Python is a great programming language for beginners, it is also used extensively for practical applications in engineering and data science. This course is intended for people with no or very little prior programming experience. It covers a range of topics, such as data types, control flow, functions, file operations, and object-oriented programming. When you finish this course, you will be able to create Python programs for a variety of applications.

## Topics Covered

- Unit 1: Introduction to Python 3
- Unit 2: Operators
- Unit 3: Input and Flow Control Statements
- Unit 4: Data
- Unit 5: Functions
- Unit 6: Basic Data Structures II – Tuples, Sets, and Dictionaries
- Unit 7: File Handling

## Outcome of the program

After completion of this program, the students are able to

- write Python programs within an Integrated Development Environment (IDE);
- explain and apply the basic variable types *int*, *float*, *str*, and *bool*;
- apply operators and operator precedence;
- write programs that apply control structures, lists, strings, sets, tuples, and dictionaries;
- write programs that import libraries for a variety of applications, such as random numbers and data visualization;
- write interactive programs that ask for and use input from the user;
- write programs that use functions and methods;
- apply data visualization tools for basic data analysis;
- translate search terms into regular expressions;
- handle errors and exceptions in Python programs by using *try*, *except*, and *finally* statements; and

## ABOUT THE WORKSHOP

A **Cyber Security Workshop** is a training program designed to provide participants with both theoretical knowledge and practical skills to protect systems, networks, and data from cyber threats. Such workshops are especially useful for students and professionals who want to understand real-world security challenges and solutions.

In a typical cyber security workshop, participants learn about important concepts such as network security, ethical hacking, malware analysis, password security, and data protection. The sessions often include hands-on activities where learners practice using security tools, identify vulnerabilities, and simulate cyber attacks in a controlled environment.

The main objective of a cyber security workshop is to create awareness about online threats and to develop skills required to prevent, detect, and respond to cyber attacks. It also helps participants understand safe internet practices, such as avoiding phishing attacks, creating strong passwords, and securing personal information.

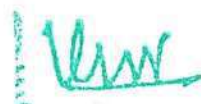

These workshops are usually conducted by experienced professionals or faculty members who guide participants through practical exercises and real-time demonstrations. By the end of the workshop, participants gain confidence in handling basic security issues and become more responsible digital users.

Overall, a cyber security workshop plays an important role in building technical knowledge, improving problem-solving skills, and preparing individuals for careers in the field of information security.

**Cyber Security** refers to the practice of protecting computers, networks, systems, and data from digital attacks, theft, or damage. It ensures that information remains **confidential, accurate, and available** when needed.

### Key Objectives of Cyber Security

- **Confidentiality:** Protecting sensitive data from unauthorized access
- **Integrity:** Ensuring data is not altered or tampered with
- **Availability:** Making sure systems and data are accessible when required

## ABOUT THE DEPARTMENT

### What We Do

Our Civil Engineering department seeks to understand natural phenomena and their applications in the field, and utilize that knowledge to innovate and build sustainable engineering structures for Society. We educate our students in both natural and manmade systems, which enable them to get a true sense of the science of civil engineering.

Our faculty and staff are dedicated to teaching our students such that they are best equipped to serve the region and the nation as professionals, scholars, academic leaders, researchers, and entrepreneurs, and tackle complex engineering problems in the field.

### What We Offer

Established in the year 2009, our Department of Civil Engineering offers undergraduate programme (B.Tech) with a flexible curriculum that adapts to the ever-increasing discoveries in the field.

Our civil engineering department employs an experienced faculty and cutting-edge learning avenues in the fields of Surveying, Fluid Mechanics, Strength of Materials, Engineering Geology and Environmental Engineering, Geotechnical Engineering, Highway Engineering, and Concrete Technology.

Our department also offers specialization in structural, geotechnical, hydraulics and water resources, environmental, construction, transportation, and more.

Our students attend workshops, conferences, seminars, and paper-presentation forums that focus on interdisciplinary topics, and receive exposure to guest lecturers of premium institutions.

We offer an education that will transform our students into leaders in the field of civil engineering.

### ABOUT LSIT:
